Wednesday, June 20\textsuperscript{th}, 2018

8:00am – 5:00pm  Executive Committee Meeting (Rexford)

Thursday, June 21\textsuperscript{st}, 2018

7:00am – 8:00am  Area Program Chair’s Breakfast Meeting (Dining Room Reserved Table Back Corner)

8:00am – 9:30am  Concurrent Sessions

**Sport and Exercise Psychology Symposium – Are You Feeling Good Yet? Addressing The Need For Pleasure During Continuous, Interval, And Resistance Training Protocols** (Crystal C)

- **Organizer:** Leighton Jones, Sheffield Hallam University, UK
- **Discussant:** Anne Cox, Washington State University
- **Moderator:** Amber Mosewich, University of Alberta

**Symposium Overview**
Leighton Jones, Sheffield Hallam University, UK; Zachary Zenko, Duke University; Matthew Stork, University of British Columbia

**Decrease the intensity, increase the pleasure and enjoyment: Findings from a resistance training experiment**
Zachary Zenko, Duke University; Jasmin Hutchinson, Springfield College

**A comparison of psychological and behavioral responses to interval and continuous exercise among inactive adults**
Matthew Stork, University of British Columbia; Martin Gibala, McMaster University; Kathleen Martin Ginis, University of British Columbia

**Can hiit be more pleasant? Examining the affective responses to different applications of music during hiit**
Leighton Jones, Sheffield Hallam University, UK; Matthew Stork, University of British Columbia; Liam Oliver, Sheffield Hallam University, UK
Sport and Exercise Psychology Verbal Presentations – Exercise and Cognition (Crystal B)

Moderator: Matthew Pontifex, Michigan State University

8:00 Effects of exercise on cognition: Preventing decline in older adults
Selen Razon, West Chester University; Jean-Charles Lebeau, Ball State University; Matthew Thomas, Goshen Hospital; Leonard Kaminsky, Ball State University; Jocelyn Bolin, Ball State University

8:15 The effect of acute exercise on neural activation and memory performance
Alexis B Slutsky, Aiko Ueno, Sudharani Arunachalam, Jennifer L Etnier, University of North Carolina at Greensboro

8:30 Longer, further, faster: Associations between fitness and executive functions in children
Emily Bremer, McMaster University; Jeffrey D. Graham, McMaster University; John Cairney, University of Toronto

8:45 The effect of moderate intensity continuous exercise training on high interference memory in young adults
Kristen Lucibello, Jennifer Heisz, McMaster University

9:00 Fitness as a moderator of the aging and cognition relationship: An ERP study
Christopher Brush, Rutgers University; Peter Ehmann, Rutgers University; Ryan Olson, University of North Texas; Anthony Bocchine, Rutgers University; Brandon Alderman, Rutgers University

9:15 Investigating the role of tonic and phasic locus-coeruleus activation in modulating cognition following acute exercise
Amanda L. McGowan, Madison C. Chandler, Jan W. Brascamp, Matthew B. Pontifex, Michigan State University

Motor Learning and Control Verbal Presentations – Movement Disorders, Disability, and Rehabilitation (Crystal A)

Moderator: Jan Hondzinski, Louisiana State University

8:00 Is intensity a critical factor in motor rehabilitation for Parkinson’s disease?
Quincy Almeida, Matthew T. Lasswell, Eric N. Beck, Wilfrid Laurier University

8:15 Using coordination tasks to screen people with a history of mTBI
Shaochen Huang, Boyi Dai, Qin Zhu, University of Wyoming

8:30 Exploring the relationship between otolith function, sensorimotor integration, and postural control in chronic mild traumatic brain injury
Deborah Jehu, Oregon Health & Science University; Sean Kempel, The Veteran Affairs Portland Health Care System; Lucy Parrington, Oregon Health & Science University; Peter Fino, Oregon Health & Science University; Timothy Hullar, Oregon Health & Science University; Laurie King, Oregon Health & Science University

8:45 Locomotor adjustments during stair ascent in children with Down syndrome: Comparison between walking and crawling strategies
Huaqing Liang, Jianhua Wu, Georgia State University
9:00  **Acute effects of assisted cycling therapy on upper extremity motor function after stroke**  
Simon Holzapfel, Arizona State University; Shannon Ringenbach, Arizona State University; Pamela Bosch, Northern Arizona University; Chong Lee, Arizona State University; Brittany Heyer, Arizona State University

9:15  **Dual-task cost and cognition in patients with chronic mTBI**  
Lucy Parrington, Tyler Duffield, Peter Fino, Laurie King, Oregon Health & Science University

**Motor Development Symposium – Celebrating 50 Years of The Michigan State University Motor Performance Study (Crestone B)**

**Organizer:** Larissa True, SUNY Cortland  
**Discussant:** Karin Pfeiffer, Michigan State University  
**Moderator:** Sam Logan, Oregon State University

**An overview of the Michigan State University motor performance study: Then and now**  
Crystal Branta, Michigan State University; John Haubenstricker, Michigan State University; Karin Pfeiffer, Michigan State University; Larissa True, SUNY Cortland; Eric Martin, Boise State University; Shannon Siegel, University of San Francisco; Vern Seefeldt, Michigan State University

**Influence of adiposity and maturation on fitness in girls**  
Christine Pacewicz, Karin Pfeiffer, Amy Nuttall, Crystal Branta, John Haubenstricker, Vern Seefeldt, Michigan State University

**Tracking of physical fitness components from childhood to adolescence: A longitudinal study**  
Larissa True, SUNY Cortland; Eric Martin, Boise State University; Karin Pfeiffer, Michigan State University; Shannon Siegel, University of San Francisco; Crystal Branta, Michigan State University; John Haubenstricker, Michigan State University; Vern Seefeldt, Michigan State University

**Youth sport participation and adult physical activity: The influence of fundamental movement skill instruction during childhood**  
Eric Martin, Boise State University; Larissa True, SUNY Cortland; Karin Pfeiffer, Michigan State University; Shannon Siegel, University of San Francisco; Crystal Branta, Michigan State University; John Haubenstricker, Michigan State University; Vern Seefeldt, Michigan State University

---

9:30am – 9:45am  
**Refreshment Break**

---

9:45am – 11:15am  
**Concurrent Sessions**

**Multidisciplinary Symposium – Cognitive-Motor And Psychological Mechanisms Underlying Motor Control And Learning In A Social Context: From Human-Human To Human-Robot Dynamics (Crystal C)**

**Organizer:** Rodolphe Gentili, University of Maryland; Matthew Miller, Auburn University  
**Discussant:** Will Wu, California State University - Long Beach  
**Moderator:** Richard Magill, Columbia University

**Symposium Overview – Cognitive-motor and psychological mechanisms underlying motor control and learning in a social context: From human-human to human-robot dynamics**  
Rodolphe Gentili, University of Maryland; Matthew Miller, Auburn University
When practice together moderates how we practice, yet not to the detriment of our own learning
Nicola Hodges, April Karlinsky, University of British Columbia

Advantages of dyad and triad practice
Charles Shea, Deanna Kennedy, Texas A&M University

Understanding group motivation gains in exercise and sport contexts
Deborah Feltz, Christopher Hill, Michigan State University

The effects of team environment on cognitive resource allocation
Matthew Miller, Auburn University

Assessing motor performance and mental workload during team practice: When robotic systems inform human motor behavior
Rodolphe J. Gentili, Isabelle M. Shuggi, University of Maryland

Sport and Exercise Psychology Verbal Presentations – Youth Sport (Crystal B)
Moderator: Nicole Bolter, San Francisco State University

9:45 Exploring long-term behavioural consequences of early specialization in swimming among masters swimmers
Heather K. Larson, University of Alberta; Tara-Leigh F. McHugh, University of Alberta; Bradley W. Young, University of Ottawa; Wendy M. Rodgers, University of Alberta

10:00 Perceptions of youth sport specialization: Content analysis across differing patterns of participation
Justin DiSanti, Michigan State University; Emily Wright, Michigan State University; Melissa Chase, Miami University; Karl Erickson, Michigan State University

10:15 Parent conditional regard and the development of perfectionism in adolescent athletes: The mediating role of competence contingent self-worth
Thomas Curran, University of Bath, UK

10:30 Parent-child relationships in youth sport: The positive impact of parental perceived responsiveness
Olivier Y. Rouquette, Swansea University, UK; Camilla J. Knight, Swansea University, UK; Victoria E. Lovett, Swansea University, UK; Jean-Philippe Heuzé, Université Grenoble Alpes, France

10:45 A citation network analysis of research on the parent-child relationship in organized youth sport
Travis Dorsch, Matthew Vierimaa, Juliana Plucinik, Utah State University

11:00 Parents’ perfectionism, parenting styles, and views of sport specialization
Emily Wright, Michigan State University; Melissa Chase, Miami University; Robin Vealey, Miami University; Thelma Horn, Miami University

Motor Development Verbal Presentations – Motor Learning & Control in Special Populations (Crystal A)
Moderator: Jane Clark, University of Maryland

9:45 Knee joint kinematics of the pendulum test in children with and without Down syndrome
Diego Ferreira, Huaqing Liang, Jianhua Wu, Georgia State University
10:00  **Children with Down syndrome display typical intersegmental coordination during turning phase of the Timed Up-and-Go test**

_ Matthew Beerse, Michael Lelko, Jianhua Wu, Georgia State University_

10:15  **Mild cognitive impairment declines learning of a simple movement sequence.**

_ Stephan Panzer, Saarland University, Germany; Willem Verwey, University of Twente, The Netherlands; Janine Vieweg, Saarland University, Germany; Peter Leinen, Saarland University, Germany_

10:30  **Visual attention to instructional supports in autism spectrum disorder: A case-control study**

_ J. Megan Irwin, University of South Carolina; Keith Lohse, University of Utah; Mary Rudisill, Auburn University; Melissa Pangelinan, Auburn University_

10:45  **Physical activity level changes are related to motor skill changes in infants with Down syndrome**

_ Kathryn L. Gwizdala, Isabella T. Felzer-Kim, Janet L. Hauck, Michigan State University_

11:00  **The influence of motor competence and obesity on physical activity and fitness among children with intellectual and developmental disabilities**

_ Kerri Staples, University of Michigan; Kyla Collins, Texas Christian University; Sara Lautenslager, University of Regina; Kendra McLeod, University of Regina; Amanda Federink, University of Regina_

---

**Motor Development Symposium – A Cultural Perspective on The Interaction of Actual And Perceived Motor Performance And Their Correlates In Children** (Crestone B)

**Organizer:** Dennis Dreiskaemper, University of Muenster, Germany  
**Discussant:** Nadja Schott, University of Stuttgart, Germany  
**Moderator:** Jacqueline Goodway, Ohio State University

**Symposium overview: A cultural perspective on the interaction of actual and perceived motor performance and their correlates in children**

_ Dennis Dreiskaemper, University of Muenster, Germany_

**Cultural perspective on the interaction of actual and perceived motor performance in children**

_ Maike Tietjens, University of Muenster, Germany; Dennis Dreiskaemper, University of Muenster, Germany; Nadja Schott, University of Stuttgart, Germany; Till Utesch, University of Muenster, Germany; Trina Hinkley, Deakin University, Australia; Lisa M. Barnett, Deakin University, Australia; Natalie Lander, Deakin University, Australia; Benjamin Holfelder, University of Stuttgart, Germany_

**The measurement of the physical self-concept/self-perception of motor competence in childhood: A review**

_ Dennis Dreiskaemper, University of Muenster, Germany; Till Utesch, University of Muenster, Germany; Farid Bardid, University of Strathclyde, UK; Maike Tietjens, University of Muenster, Germany_

**Fit girls and skillful boys? Direct and indirect relationships of physical activity, motor performance, and physical fitness on cognition in children**

_ Nadja Schott, University of Stuttgart, Germany; Benjamin Holfelder, University of Stuttgart, Germany; Emiliano Mazzoli, Deakin University, Australia_

**How stable is perceived motor competence over one year and does it differ for boys and girls?**

_ Lander, Deakin University, Australia; Trina Hinkley, Deakin University, Australia; Nadja Schott, University of Stuttgart, Germany; Maike Tietjens, University of Muenster, Germany; Till Utesch, University of Muenster, Germany; Dennis Dreiskaemper, University of Muenster, Germany_
11:30am – 12:30pm  Conference Welcome and Human Kinetics Lecture (Crystal Ballroom)

Conference Welcome and Introduction of Human Kinetics Lecturer
   Daniela Corbetta, University of Tennessee, NASPSPA Past-President

Human Kinetics Lecture - Visual control of natural actions
   Mary Hayhoe, University of Texas at Austin

12:30pm – 1:45pm  Past-Presidents Luncheon (Leadville)

12:30pm – 1:45pm  Student-Faculty Luncheon (Aspen)

12:30pm – 1:45pm  JSEP Editorial Board Lunch Meeting - Human Kinetics (Rexford)

1:45pm – 3:15pm  Concurrent Sessions

Motor Learning and Control Symposium – Learning To Organize and Reorganize Movement

Coordination Patterns (Crystal C)

Organizer: Karl Newell, University of Georgia
Discussant: Jill Whitall, University of Maryland
Moderator: Rob Horn, Montclair State University

Introduction to theme of symposium
   Karl Newell, University of Georgia

Control parameter and collective variable dynamics in a degenerate perceptual-motor task
   Yeou-Teh Liu, National Taiwan Normal University, Taiwan; Kuo-Liang Chuang, National Taiwan Normal University, Taiwan; Karl Newell, University of Georgia

Altering bimanual coordination patterns in redundant motor tasks
   Rajiv Ranganathan, Michigan State University; Federica Danese, University of Genoa, Italy; Edoardo Corona, University of Genoa, Italy; Maura Casadio, University of Genoa, Italy

Adaptations in postural control to different task constraints in people with multiple sclerosis
   Richard Van Emmerik, Julianna Averill, Michael Busa, University of Massachusetts

Sport and Exercise Psychology Verbal Presentations – Exercise Motivation (Crystal B)

Moderator: Kathleen S. Wilson, California State University, Fullerton

1:45  An exploratory study on flow under köhler paradigm with software-generated partners
   Seungmin Lee, Nicholas D. Myers, Taiwoo Park, Christopher Hill, Deborah L. Feltz, Michigan State University

2:00  I can see it in your face: Exercisers’ and non-exercisers’ automatic affective valuations of exercise
   Ralf Brand, University of Potsdam, Germany; Lukas Ulrich, Humboldt-University Berlin, Germany

2:15  Testing the integrated behavior change model in gym members: A longitudinal study
   Navin Kaushal, University of Montreal; Martin S. Hagger, Curtin University, Australia; Béatrice Bérubé, University of Montreal; Louis Bherer, University of Montreal

Motor Development Symposium – Best Practices For The Development And Implementation of Physical Activity And Motor Skill Interventions For Preschoolers (Crestone B)

Organizer: Danielle Wadsworth, Auburn University
Discussant: Jacqueline Goodway, Ohio State University
Moderator: Frank Snyder, Central Michigan University

Introduction of symposium
Danielle Wadsworth, Jerraco Johnson, Melissa Pangelinan, Auburn University

Critical environmental factors: Best practices for elucidating positive changes in fundamental motor skill learning in preschool-age children
Jerraco Johnson, Mary Rudisill, Auburn University

Best practices to elicit moderate to vigorous physical activity in preschoolers: A social ecological approach
Danielle Wadsworth, Alexandra Venezia, Auburn University

Measuring the immediate and long-term effects of motor skill and physical activity intervention on cognitive and academic skills
Melissa Pangelinan, Julia Sassi, Brooke Converse, Auburn University

3:15pm – 3:30pm Break

3:30pm – 4:15pm Early Career Distinguished Scholar Lectures (Crystal Ballroom)

Moderator: Daniela Corbetta, University of Tennessee

Introduction: Jacqueline Goodway, Ohio State University
A little clumsy and full of problems: Mechanisms and consequences of developmental coordination disorder
Priscila Caçola, University of Texas at Arlington

Introduction: Nicola Hodges, University of British Columbia
Exploring measurement and methodology in motor behavior
Keith Lohse, University of Utah

4:15pm – 6:15pm Poster Session #1 (3rd Floor Lobby)

Moderators: Danielle Felsberg, University of North Carolina, Greensboro
Kathleen Mellano, Michigan State University
Chrissy Pacewicz, Michigan State University
Ryan Sacko, The Citadel

See Pages 23-30 of this conference program for a list of the posters. Please set up posters by Noon. If you have an odd-numbered poster, please stand at your poster for the first hour. If you have an even-numbered poster, please stand at your poster for the second hour.

6:15pm – 6:45pm Presentation of Distinguished Scholar Award (Crystal Ballroom)

6:45pm – 8:15pm Wine and Cheese Happy Hour (2nd Floor Foyer)

Please join us for wine and light hors d’oeuvres and offer congratulations to our distinguished scholars. Dinner is on your own after this event.
Friday, June 22\textsuperscript{nd}, 2018

8:00am – 9:30am  Concurrent Sessions

**Sport and Exercise Psychology Symposium – Licit And Illicit Performance Enhancement In Sport And Education (Crystal C)**

- **Organizer:** Ian David Boardley, University of Birmingham, UK
- **Discussant:** Daniel Gould, Michigan State University
- **Moderator:** Alyson Crozier, University of South Australia, Australia

**Development and validation of indirect measures of athletes’ attitudes towards controlled and uncontrolled forms of performance enhancement in sport**

- John Mills, University of Essex, UK; Ian David Boardley, University of Birmingham, UK; Alexandra Olton, University of Birmingham, UK

**Antecedents and outcomes of technical and strength and conditioning coaches' doping confrontation efficacy beliefs**

- Ian David Boardley, University of Birmingham, UK; Jonathan Grix, Manchester Metropolitan University, UK; Ceri Wynne, University of Birmingham, UK; Alan Smith, Michigan State University; Nikos Ntoumanis, Curtin University, Australia

**Athletes’ perceptions of coach doping confrontation efficacy and athletes’ susceptibility to intentional and inadvertent doping in athletics and rugby**

- Anthony Knox, University of Birmingham, UK; Ian David Boardley, University of Birmingham, UK; Ceri Wynne, University of Birmingham, UK; Alan Smith, Michigan State University; Nikos Ntoumanis, Curtin University, Australia

**A qualitative investigation of psychosocial factors facilitating students’ use of cognitive enhancing drugs**

- Andrew Heyes, Ian David Boardley, University of Birmingham, UK

---

**Sport and Exercise Psychology Verbal Presentations – Social Influence (Crystal B)**

- **Moderator:** Jennifer Brunet, University of Ottawa

8:00  Are significant others really insignificant? A response surface analysis of subjective norms in predicting physical activity intentions

- Jeemin Kim, Mark Eys, Jennifer Robertson-Wilson, Emily Dunn, Kayla Rellinger, Wilfrid Laurier University

8:15  A tripartite efficacy examination of the personal trainer-client relationship

- Christopher Hill, Deborah Feltz, Michigan State University

8:30  Perceived social support predicts competition appraisals and performance satisfaction among varsity athletes: Organizational stressors as moderators

- Katherine Tamminen, University of Toronto; Catherine Sabiston, University of Toronto; Peter Crocker, University of British Columbia
8:45 Social perceptions, sport-specific coping, and burnout in American collegiate club athletes
J.D. DeFreese, University of North Carolina at Chapel Hill; Nikki Barczak, University of North Carolina at Chapel Hill; Johna Register-Mihalik, University of North Carolina at Chapel Hill; Emily Kroshus, University of Washington; Shelby Waldron, University of North Carolina at Chapel Hill

9:00 Motivation contagion: Effects of exerciser weight status and perceived motivation on fitness instructors’ motivation and beliefs about the exerciser
Michelle Guerrero, University of Windsor; Nikos Ntoumanis, Curtin University, Australia; Cecilie Thogersen-Ntoumani, Curtin University, Australia; Courtney Gadeke, Curtin University, Australia

9:15 Measuring peer athlete mentoring functions: Development of the Athlete Mentoring Questionnaire (AMQ)
Matt D. Hoffmann, Todd M. Loughead, University of Windsor

Motor Learning and Control Verbal Presentations – Self-Control Effects on Motor Learning (Crystal A)
Moderator: Kevin Becker, Texas Woman’s University

8:00 Different degrees of choice influence self-controlled feedback effects on motor learning
Jeffrey Fairbrother, University of Tennessee; Andy Bass, University of Tennessee; Aaron von Lindern, College of Western Idaho, Kaylee Couvillion, University of Tennessee

8:15 Does the prompt that a participant receives for feedback contribute to the learning advantage of self-controlled practice?
Julia Hussien, University of Ottawa; Zachary D. Yantha, University of Ottawa; Michael J. Carter, McMaster University; Diane M. Ste-Marie, University of Ottawa

8:30 Exploring the neurophysiological mechanisms determining the regulation of difficulty in self-controlled practice
Anupriya Pathania, University of Utah

8:45 Working memory engagement during self-controlled practice: An EEG study
Kyle J. Jaquess, University of Maryland; Yingzhi Lu, Shanghai University of Sport, China; Andrew Ginsberg, University of Maryland; Calvin Lu, University of Maryland; Bradley Ritland, University of Maryland; Hyuk Oh, University of Maryland; Steven Kahl, University of Maryland; Bradley D. Hatfield, University of Maryland; Rodolphe J. Gentili, University of Maryland

9:00 Measuring cortical 1/f noise in a motor learning paradigm: Effects of difficulty, performance, and time
Keith Lohse, University of Utah; Anupriya Pathania, University of Utah; Amber Leiker, Auburn University; Matthew Miller, Auburn University

9:15 Self-control effects during a reduction of feedback availability
Aaron von Lindern, College of Western Idaho; Andrew Bass, University of Tennessee; Jeffrey Fairbrother, University of Tennessee

Motor Development Verbal Presentations – Exploration and Play (Crestone B)
Moderator: Mei-Hua Lee, Michigan State University

8:00 An exploration of how infant locomotor experience facilitates psychological change
David I. Anderson, San Francisco State University; Minxuan He, San Francisco State University; Joseph J. Campos, University of California, Berkeley
How does the discovery of a non-obvious perceptual property impact perceptual-motor exploration of objects in infants?
Rebecca F. Wiener, Daniela Corbetta, University of Tennessee

Posture and play: How infants use their bodies to interact with their surroundings in the first two years
Sabrina L. Thurman, Elon University; Daniela Corbetta, University of Tennessee

Differences in parental behaviors of parents of young children with and without ASD in two different play settings
Byungmo Ku, Megan MacDonald, Bridget Hatfield, Oregon State University

Mobility is a fundamental human right: Factors predicting attitudes toward self-directed mobility
Samuel W. Logan, Kathleen R. Bogart, Samantha M. Ross, Erica Woekel, Jenna Fitzgerald, Samantha Ligman, Christina Cafferata, Oregon State University

The impact of object size on children's motor planning skills
Sara Scharoun Benson, University of Windsor

Multidisciplinary Symposium – “What, So What, And Now What?” Translating Positive Youth Development (PYD) Research To Program Improvements In Curricula And Coach Training (Crystal C)
Organizer: Maureen Weiss, University of Minnesota
Discussant: Allison Riley, Girls on the Run International, Charlotte, NC
Moderator: Megan Stellino, University of Northern Colorado

Introduction to the symposium
Maureen Weiss, University of Minnesota

Using research and evaluations to inform improvements in LiFEsports: “So what” to “Now what?”
Dawn Anderson-Butcher, Ohio State University; Anthony Amorose, Illinois State University

Longitudinal impact of The First Tee on PYD: “So what” to “Now what?”
Nicole Bolter, San Francisco State University; Maureen Weiss, University of Minnesota

“So what?” Connecting research and practice through the PYDSportNET program
Nicholas Holt, Kurtis Pankow, University of Alberta

“What ... so what?” Girls on the run — a longitudinal evaluation of program impact
Maureen Weiss, University of Minnesota; Lindsay Kipp, Texas State University; Alison Phillips, University of Iowa; Sarah Espinoza, University of Minnesota; Hailee Moehnke, University of Minnesota; Nicole Bolter, San Francisco State University

“Now what?” A practitioner’s perspective on translating PYD research to program improvements
Allison Riley, Girls on the Run International
Sport and Exercise Psychology Verbal Presentations – Physical Activity Intervention (Crystal B)

Moderator: Brandon Alderman, Rutgers University

9:45 How can academic and community partners support healthy eating and physical activity programs in childcare and early-learning centers?
   Angela M. Coppola, Indiana University Kokomo; Allison L. Voils, Indiana University Kokomo; Janet Gafkjen, Partnership for a Healthy Hamilton County; David J. Hancock, Indiana University Kokomo

10:00 Exploring the relationship between parent and child physical activity during a family-based fitness intervention
   Danielle Wadsworth, Shelby Foote, Alexandria Venezia, Auburn University

10:15 Ahead of the game: Results of a sports-based mental health program for adolescent males
   Stewart Vella, University of Wollongong, Australia; Christian Swann, University of Wollongong, Australia; Katherine Boydell, University of New South Wales, Australia; Simon Eckermann, University of Wollongong, Australia; Andrea Fogarty, University of New South Wales, Australia; Sarah Liddle, University of Wollongong, Australia; Chris Lonsdale, Australian Catholic University, Australia; Andrew Miller, University of Newcastle, Australia; Anthony Okely, University of Wollongong, Australia; Frank Deane, University of Wollongong, Australia

10:30 The effects of gender relevant physical activity program on girls’ fitness and perceptions of physical activity
   Phillip Post, Rebecca Palacios, New Mexico State University

Motor Learning and Control Verbal Presentations – Practice Conditions and Instruction (Crystal A)

Moderator: Diane Ste-Marie, University of Ottawa

9:45 The effects of practicing a motor skill in virtual reality
   Jared Porter, Koleton Cochran, Southern Illinois University

10:00 Those who expect to teach a motor skill cannot perform better under high pressure
   Marcos Daou, Auburn University; Jence Rhoads, Auburn University; Mariane Bacelar, Auburn University; Zach Hutchison, Auburn University; Keith Lohse, University of Utah; Matthew Miller, Auburn University

10:15 Improving acquisition of manual wheelchair skills: An EEG study using motor learning principles
   Jence Rhoads, Auburn University; Mariane Bacelar, Auburn University; Marcos Daou, Auburn University; Won Valerius, Auburn University; Briana Carter, Auburn University; Lucia Scaglione, Auburn University; Keith Lohse, University of Utah; Matthew Miller, Auburn University

10:30 Effect of feedback within a novel virtual reality obstacle crossing environment
   Chanel LoJacono, JD Manzo, Ashley Sanchez, Christopher Rhea, University of North Carolina at Greensboro

10:45 Learning with LEGO: Observational learning of a complex motor task with partially occluded field of vision
   Portia Kalun, Jennifer Zering, Lauren Smail, Ranil Sonnadara, McMaster University
11:00  **Observational uses of athletes with disabilities**  
  McKenzie Gamble, Kathleen Sanchez-Milliiken, Ralael Alamilla, Olivia Wilson, Christopher Gentry, Amanda Rymal, California State University

**Motor Development Verbal Presentations – Assessments and Interventions (Crestone B)**

  **Moderator:** Mike Wade, University of Minnesota

  9:45  **Leg movement rate pre- and post-kicking intervention in infants with Down syndrome**  
  Rahil Khasgwiwale, Beth Smith, University of Southern California; Julia Looper, University of Puget Sound

  10:00  **Motor developmental windows and trajectories of preterm and full-term infants in the first year of life**  
  Nadia Cristina Valentini, Keila Ruttnig Guidony Pereira, Eloá Maria dos Santos Chiquetti, Universidade Federal do Rio Grande do Sul; Cibelle Kayenne Martins Roberto Formiga, Universidade Estadual de Goiás; Maria Beatriz Martins Linhares, Universidade Estadual de São Paulo

  10:15  **Effect of caregiver physical interaction on characteristics of spontaneous movements in infants**  
  Priya Patel, Faezeh Hajiaghajani, Subir Biswas, Mei-Hua Lee, Michigan State University

  10:30  **Autism in infant siblings: A case study**  
  Anastasia Kyvelidou, Creighton University

  10:45  **Enjoy the fun of driving! The preliminary results of motivation and the ride-on car training with two different postures in toddlers with disabilities**  
  Hsiang-Han Huang, Yu-Hsin Hsieh, Wan-Ying Tsai, Ming-Ke Shih, Chang Gung University, Taiwan; Chia-Ling Chen, Chang Gung Memorial Hospital, Taiwan

  11:00  **SKIPing to fundamental motor skill competence with developmentally delayed preschoolers**  
  Jacqueline Goodway, Ruri Famelia, Ohio State University

11:30am – 12:30pm  **Motor Development Keynote Lecture (Crystal Ballroom)**

  **Moderator:** Jeffrey Haddad, Purdue University

  **Infant’s Actions Broaden Their Mind**  
  Gustaf Gredebäck, University of Uppsala, Sweden

12:30pm – 1:00pm  **Pick up box lunch in Crestone A (3rd Floor - bring your ticket)**

1:00pm – 2:45pm  **Business Meeting and Award Luncheon (Crystal Ballroom - bring your lunch)**

2:45pm – 4:15pm  **Senior Lecturers (Crystal Ballroom)**

  **Moderator:** Jill Whitall, University of Maryland

  **The use of observation for motor learning and performance: Current trends and future directions**  
  Diane Ste-Marie, University of Ottawa

  **Promoting actual and perceived motor competence in the early years: SKIPing toward physical literacy**  
  Jacqueline D. Goodway, Ohio State University

  **Developing youth leadership through sport by leveraging the scholastic captain experience**  
  Daniel Gould, Michigan State University
4:15pm – 6:15pm  **Poster Session #2 (3rd Floor Lobby)**

*Moderators:* Kylee Couvillion, University of Tennessee
Thomas Curran, University of Bath, UK
Rashelle Hoffman, University of Nebraska Medical Center
Jerraco Johnson, Auburn University

See Pages 31-38 of this conference program for a list of the posters. Please set up posters by Noon. If you have an odd-numbered poster, please stand at your poster for the first hour. If you have an even-numbered poster, please stand at your poster for the second hour.

6:30pm  **SportRxiv Hackathon: Developing Open Science Practices in Sport, Exercise, and Physical Activity Related Domains** (Crestone A)

6:30pm  **3 Minute Thesis Competition** (Crestone B)

6:50pm  **Student Meeting** (Crestone B)

7:30pm  **Student Social**
Saturday, June 23rd, 2018

7:00am – 8:00am  JMLD Editorial Board Breakfast Meeting - Human Kinetics (Rexford - 3rd Floor)

8:00am – 9:30am  Concurrent Sessions

**Sport and Exercise Psychology Symposium – “I Knew They’d Do That!” Contextual Information, Perception, And Action** (Crystal C)

*Organizer:* Robin C. Jackson, Loughborough University, UK  
*Discussant:* Robin C. Jackson, Loughborough University, UK  
*Moderator:* JD Defreese, University of North Carolina at Chapel Hill

**Actions become "super-deceptive" when preceded by (congruent) situational probability information**  
Robin C. Jackson, Loughborough University, UK; Hayley Barton, Brunel University London, UK

**Soccer penalty kicking behaviors are influenced by goalkeepers’ reputations**  
Rouwen Cañal-Bruland, Jonathan Felix Bes, Florian Müller, Friedrich Schiller University Jena, Germany

**Option generation and skilled anticipation behavior in tennis**  
Colm Murphy, St Mary’s University, London, UK; Robin C. Jackson, Loughborough University, UK; A. Mark Williams, University of Utah

**Anticipation and the use of probabilistic information in the presence of ambiguous movement kinematics**  
Fabian Helm, Goethe-University Frankfurt, Germany; Rouwen Cañal-Bruland, Friedrich Schiller University Jena, Germany; David L. Mann, Vrije Universiteit Amsterdam, The Netherlands; Nikolaus F. Troje, Queen’s University; Jörn Munzert, Justus-Liebig-University Giessen, Germany

**More "novice-like" gaze behavior, and decreased performance, when contextual information increases uncertainty in batting**  
David L. Mann, Vrije Universiteit Amsterdam, The Netherlands; Vishnu Sarpeshkar, National Sports Institute of Malaysia, Malaysia; Bruce Abernethy, The University of Queensland, Australia

**Sport and Exercise Psychology Verbal Presentations – Sport Motivation** (Crystal B)

*Moderator:* Cheryl Stuntz, St. Lawrence University

8:00  **Women athletes’ early-season self-compassion, sport performance perceptions, and well-being**  
Margo E. K. Adam, University of Saskatchewan; Noreen Murphy, Saskatchewan Sport Inc.; Leah J. Ferguson, University of Saskatchewan

8:15  **An examination of the influence of perceived coaching behaviors and self-determined motivation on student-athletes’ grit and mental toughness**  
Lloyd Scharneck, Scott Pierce, Anthony Amorose, Illinois State University

8:30  **Predicting performance in athlete pairs: Unique effects among self-, other-, and collective efficacy**  
Christine Marie Habeeb, University of Stirling; Robert C. Eklund, Florida State University; Pete Coffee, University of Stirling
8:45  Assessing need supporting, thwarting and indifferent coaching styles: Development and validation of a new multidimensional measure
   Nikita Bhavsar, Curtin University, Australia; Nikos Ntoumanis, Curtin University, Australia; EleanorQuested, Curtin University, Australia; Richard Ryan, Australian Catholic University, Australia; Johnmarshall Reeve, Korea University, South Korea; Daniel Gucciardi, Curtin University, Australia; Cecilie Thøgersen-Ntoumani, Curtin University, Australia

9:00  Individual and climate perceptions in Finnish youth team sport athletes: A prospective and retrospective Study
   Thaís Zanatta, Texas Tech University; Marc Lochbaum, Texas Tech University; Niilo Konttinen, Research Institute for Olympic Sports, Finland; Christoph Rottensteiner, Research Institute for Olympic Sports, Finland

9:15  Coaching behaviors and athlete motivation: A test of psychological safety
   Charity Simmons, Jordan Blazo, Mitzi Desselles, Hudson Taylor, Barton Crum, Louisiana Tech University

Motor Learning and Control Verbal Presentations – Anticipation (Crystal A)

8:00  Training deceptive actions to enhance action perception: Attack is the best form of defense
   Ryan Raffan, Nelson Mandela University, South Africa; David Mann, Vrije Universiteit Amsterdam, The Netherlands; Rosa Du Randt, Nelson Mandela University, South Africa; Geert Savelsbergh, Vrije Universiteit Amsterdam, The Netherlands

8:15  Why do bad balls get wickets? The role of congruent and incongruent information in anticipation
   Oliver R. Runswick, University of Chichester, UK; André Roca, St Mary’s University, UK; A. Mark Williams, University of Utah; Allistair P. McRobert, Liverpool John Moores University, UK; Jamie S. North, St Mary’s University, London, UK

8:30  The neural correlates underlying the use of contextual and kinematic information processes during anticipation
   Marie Simonet, St Mary’s University, UK; Oliver R. Runswick, University of Chichester, UK; Jamie S. North, St Mary’s University, UK; Mark A. Williams, University of Utah; André Roca, St Mary’s University, UK

8:45  The temporal integration of information during anticipation
   Oliver R. Runswick, University of Chichester, UK; André Roca, St Mary’s University, UK; A. Mark Williams, University of Utah, USA; Allistair P. McRobert, Liverpool John Moores University, UK; Jamie S. North, St Mary’s University, UK

9:00  The influence of time spent in beginning and end-state postures on grasp choice
   Rachel Modersitzki, Breanna Studenka, Utah State University

9:15  Action-related auditory cues add to visual anticipation in tennis
   Rouwen Cañal-Bruland, Friedrich Schiller University Jena, Germany; Florian Müller, Friedrich Schiller University Jena, Germany; Björn Lach, Friedrich Schiller University Jena, Germany; Charles Spence, University of Oxford, UK

Motor Development Symposium – Exploring The Interplay Between Motor Competence And Physical Fitness Over Time: A Developmental Perspective On Physical Health In Children (Crestone B)

Organizers:  Till Utesch, Univ. of Muenster, Germany; Farid Bardid, Univ. of Strathclyde, Scotland
Discussant:  Jacqueline D. Goodway, Ohio State University
Moderator:  Jeffrey Haddad, Purdue University
A developmental perspective on physical health in children
Till Utesch, University of Muenster, Germany; Farid Bardid, University of Strathclyde, Scotland

The relationship between motor competence and physical fitness from early childhood to early adulthood: A meta-analysis
Till Utesch, University of Muenster, Germany; Farid Bardid, University of Strathclyde, Scotland; Dirk Büsch, University of Oldenburg, Germany; Bernd Strauss, University of Muenster, Germany

(In)consistency between longitudinal developmental pathways and normative data: The case of cardiorespiratory fitness
Luis Paolo Rodrigues, Instituto Politécnico de Viana do Castelo, Portugal; Vitor Lopes, Instituto Politécnico de Bragança, Portugal

Dynamics between motor competence, cardiorespiratory fitness and weight status in children: A cross-lagged longitudinal analysis
Farid Bardid, University of Strathclyde, Scotland; Till Utesch, University of Muenster, Germany; Matthieu Lenoir, Ghent University, Belgium

Classes of developmental trajectories of body mass index: Differences in motor competence and physical fitness
Vitor Lopes, Polytechnic Institute of Bragança, Portugal; Till Utesch, University of Muenster, Germany; Luis Paolo Rodrigues, Polytechnic Institute of Viana do Castelo, Portugal

9:30am – 9:45am   Refreshment Break

9:45am – 11:15am  Concurrent Sessions

Multidisciplinary Symposium – Methodological Advances In Motor Learning And Development (Crystal C)

Organizer: Keith Lohse, University of Utah
Moderator: Karl Newell, University of Georgia

Longitudinal data-analysis techniques in motor learning and development: A focus on time-varying covariates
Keith Lohse, University of Utah

Dissociating learning- and non-learning-related performance changes during motor skill training in older adults
Sydney Schaefer, Peiyuan Wang, Arizona State University; Nicolas Schweighofer, University of Southern California

The strengths and limitations of linear mixed-effects models to explore developmental relationships between the brain and cognitive-motor behavior
Genevieve Olivier, University of Utah; Serence Paul, University of Sydney, Australia; Keith Lohse, University of Utah; Christopher Walter, University of Arkansas for Medical Science; Sydney Schaefer, Arizona State University; Lee Dibble, University of Utah

The strengths and limitations of linear mixed effects models to explore developmental relationships between the brain and cognitive-motor behavior
Melissa Pangelinan, Auburn University
**Sport and Exercise Psychology Verbal Presentations – Burnout, Fatigue, and Resilience** (Crystal B)

*Moderator:* Ian David Boardley, University of Birmingham, UK

9:45 **Exploring early sport specialization: Associations with athlete burnout**
Shelby Waldron, J.D. DeFreese, Brian Pietrosimone, Johna Register-Mihalik, Nikki Barczak, University of North Carolina at Chapel Hill

10:00 **The overtraining trap: How physical fatigue impairs physical and mental recovery**
Yannick Balk, Eindhoven University of Technology, The Netherlands; Jan De Jonge, Eindhoven University of Technology, The Netherlands; Sabine Geurts, Radboud University Nijmegen, The Netherlands

10:15 **Linear and nonlinear trajectories of athlete resilience during competitive training**
Nikki Barczak, University of North Carolina at Chapel Hill; J.D. DeFreese, University of North Carolina at Chapel Hill; Emily Kroshus, University of Washington; Johna Register-Mihalik, University of North Carolina at Chapel Hill; Shelby Waldrom, University of North Carolina at Chapel Hill

10:30 **Effects of mental fatigue and incentives on exercise decision-making**
Sheereen Harris, Steven R. Bray, McMaster University

10:45 **Overcoming the effects of mental fatigue on physical activity with performance monitoring**
Denver Brown, Steven Bray, McMaster University

11:00 **Prospective examination of social identity, mental toughness, and overuse injury, and development of the test of intentions to reduce effort**
Vista Beasley, University of Stirling, UK; Calum Arthur, University of Stirling, UK; Robert Eklund, Florida State University; Pete Coffee, University of Stirling, UK

**Motor Learning and Control Verbal Presentations – Attentional Focus Effects** (Crystal A)

*Moderator:* Nick Murray, East Carolina University

9:45 **Attentional focus effects on the performance of a continuous whole-body task with object manipulation**
Kaylee Couvillion, Jeffrey Fairbrother, University of Tennessee

10:00 **Comparison of attentional focus instructions on mechanics in a gross motor skill performance and landing quality**
Masahiro Yamada, Louisa Raisbeck, University of North Carolina at Greensboro

10:15 **The presence of vision impacts attentional focus effects in a balancing task**
Kevin A Becker, Scott WT McNamara, Texas Woman's University

10:30 **Optimizing vertical jump performance**
Lee-Kuen Chua, University of Nevada; Gabriele Wulf, University of Nevada; Rebecca Lewthwaite, Rancho Los Amigos National Rehabilitation Center

10:45 **The role of distality on single leg stance**
Karen Roemer, Central Washington University; Elizabeth Jusko, Central Washington University; Christian Kupper, University of Muenster, Germany; Karen Zentgraf, Goethe University Frankfurt, Germany

11:00 **The effects of attentional focus on jump kinematics for those with chronic ankle instability**
Sean Cochran, University of North Carolina at Greensboro; Masahiro Yamada, University of North Carolina at Greensboro; Jed Diekfuss, Cincinnati Children's Hospital; Louisa Raisbeck, University of North Carolina at Greensboro
Motor Development Symposium – Cross-cultural comparisons of perceived and motor competence and health-related fitness in children and adolescents with and without disabilities (Crestone B)

Organizers: Carlos Luz, Instituto Politécnico de Lisboa, Portugal; David Stodden, University of South Carolina
Discussant: Priscila Caçola, University of Texas at Arlington
Moderator: Anastasia Kyvelidou, Creighton University

Symposium overview
Carlos Luz, Instituto Politécnico de Lisboa, Portugal; David Stodden, University of South Carolina

A cross-cultural comparison of motor competence and health related fitness variables between Portuguese and American children
Carlos Luz, Instituto Politécnico de Lisboa & CIED, Portugal; Rita Cordovil, Universidade de Lisboa, Portugal; Luis Paulo Rodrigues, Instituto Politécnico de Viana do Castelo, Portugal; Zan Gao, University of Minnesota; Jacqueline Goodway, Ohio State University; Ryan Sacko, Ohio State University; Danielle Nesbitt, University of South Carolina; Rick Ferkel, Central Michigan University; Larissa True, State University of New York at Cortland; David F. Stodden, University of South Carolina

Cross-cultural differences in children’ motor competence are accumulating along the age and in the interaction of body weight status
Vitor Lopes, Polytechnic Institute of Braganca, Portugal; Arto Laukkanen, University of Jyväskylä, Finland; Farid Bardid, University of Strathclyde, Scotland; Matthieu Lenoir, University of Ghent, Belgium; Tommi Vasankari, Pauliina Husu, UKK-Institute, Finland; Arja Sääkslahti, University of Jyväskylä, Finland

Is STS time a context-independent measurement for motor competence? A cross country comparison study (Brazil-US)
Danielle Nesbitt, University of South Carolina; Maria T. Cattuzzo, University of Pernambuco, Brazil; Ívina A. A. Soares, University of Pernambuco, Brazil; David F. Stodden, University of South Carolina

A cross-cultural comparison of Australian and Belgian female adolescents’ actual and perceived motor competence
Natalie Lander, Deakin University, Australia; An De Meester, Ghent University, Belgium; Lisa Barnett, Deakin University, Australia

Predictors of physical activity among Latvian and US children/adolescents with visual impairments
Ali Brian, University of South Carolina; An De Meester, Ghent University, Belgium; Aija Klavina, Latvian Academy of Sports Education Riga, Latvia; Sally Taunton, Adam Pennell, J. Megan Irwin, University of South Carolina; Lauren J. Lieberman, State University of New York at Brockport

11:30am-12:30pm Motor Learning and Control Keynote Lecture (Crystal Ballroom)

Moderator: Jeffrey Fairbrother, University of Tennessee

Faster than a blink of an eye: The use of sensory feedback to control how we move and interact in the world
Stephen H. Scott, Queen’s University

12:30pm – 2:00pm Conference Participants - Lunch on your own

12:30pm – 2:00pm Executive Committee Lunch Meeting (Rexford - 3rd Floor)
2:00pm – 3:00pm  **Sport and Exercise Psychology Keynote Lecture (Crystal Ballroom)**

**Moderator:** Anne Cox, Washington State University

**Competition and achievement-relevant outcomes: A hierarchical motivational analysis**
  *Andrew J. Elliot, University of Rochester*

3:00pm – 3:15pm  **Break**

3:15pm – 3:45pm  **Concurrent Sessions**

**Sport and Exercise Psychology Verbal Presentations – Emotion (Crystal C)**

**Moderator:** E. Whitney G. Moore, Wayne State University

3:15  **Athletes’ self-compassion, emotion regulation, and pre-competition appraisals and emotions**  
Amber Mosewich, University of Alberta; Kacey Neely, University of Alberta; Shannon Pynn, University of Alberta; Benjamin Schellenberg, University of Ottawa

3:30  **Hold your strength! - The influence of motivation, attention and emotion on self-control performance**  
Eva Stocker, Chris Englert, Roland Seiler, University of Bern, Switzerland

3:45  **Acute aerobic exercise improves emotion regulation: Evidence from the late positive potential**  
Peter Ehmann, Christopher Brush, Anthony Bocchine, Brandon Alderman, Rutgers University

4:00  **Exploring emotions as proximal predictors of physical activity and sedentary behavior in college students**  
Kelly Simonton, Alex Garn, Louisiana State University

4:15  **The Impact of Partner Performance on Emotions in Doubles Racquet Sports**  
Sarah Deck, The University of Western Ontario; Craig Hall, The University of Western Ontario; Philip M. Wilson, Brock University

4:30  **Emotion regulation interventions adapted to athletes’ emotional performance objectives: A multiple baseline single-subject study of 4 tennis players**  
Francis Lapointe, Université du Québec à Trois-Rivières; Daniela Wiethaeuper, Université du Québec à Trois-Rivières

**Sport and Exercise Psychology Verbal Presentations – Special Populations (Crystal B)**

**Moderator:** Lindsay Kipp, Texas State University

3:15  **Predictors of autonomous motivation for adolescents with visual impairments from the United States and Latvia: A cross-cultural examination**  
Ali Brian, University of South Carolina; An De Meester, Ghent University, Belgium; Aija Klawina, Latvian Academy of Sports Education, Latvia; Sally Taunton, University of South Carolina; Adam Pennell, University of South Carolina; J. Megan Irwin, University of South Carolina; Lauren Lieberman, State University of New York at Brockport; Leen Haerens, Ghent University, Belgium

3:30  **Sport commitment and psychological well-being in Chilean women athletes: Gender issues from the lens of intersectionality**  
Alicia Romero Carrasco, Diego Portales University, Chile; Karina Cespedes, Colorado State University; Robert Brustad, University of Northern Colorado
3:45  **Motor abilities predict executive functions in pediatric cancer survivors: Results from the Brainfit study**  
Valentin Benzing, University of Bern, Switzerland; Janine Spitzhüttl, University of Bern, Switzerland; Valerie Siegwart, University of Bern, Switzerland; Michael Grotzer, University Children’s Hospital Zurich, Switzerland; Maja Steinin, University of Bern, Switzerland; Kurt Leibundgut, University of Bern, Switzerland; Regula Everts, University of Bern, Switzerland; Mirko Schmidt, University of Bern, Switzerland

4:00  **A qualitative study exploring LGBTQ+ experiences with physical activity through a series of focus groups**  
Shannon Sarah Christine Herrick, Lindsay Duncan, McGill University

4:15  **Understanding exercise challenges & solutions for older adults aging with a mobility impairment**  
Lyndsie Koon, Maurita Harris, Wendy Rogers, University of Illinois Urbana-Champaign

4:30  **General and transgender-specific barriers to moderate-vigorous physical activity among transgender adults**  
Kelly C. Hall, University of Northern Colorado; Danielle R. Brittain, University of Northern Colorado; Miranda A. Cary, University of Saskatchewan; Nancy C. Gyurcsirk, University of Saskatchewan; Gillian Epp, University of Saskatchewan

**Motor Learning and Control Verbal Presentations – Balance and Posture** (Crystal A)  
**Moderator:** Deanna Kennedy, Texas A&M University

3:15  **An investigation into the relationship between locomotor dynamics and overall fall-risk**  
Brian Cone, University of North Carolina at Greensboro; Thurmon Lockhart, Arizona State University; Louisa Raisbeck, University of North Carolina at Greensboro; Scott Ross, University of North Carolina at Greensboro; Christopher Rhea, University of North Carolina at Greensboro

3:30  **Postural strategies when performing a manual task on an unstable support surface**  
Hoda Salsabili, Satyajit Ambike, Marissa Munoz-Ruiz, Jeffrey M Haddad, Purdue University

3:45  **Saccades attenuate body sway despite muscular fatigue negatively influencing proprioception**  
Matthew A. Yeomans, Arnold G. Nelson, Michael MacLellan, Emily M. Cooper, Jan M. Hondzinski, Louisiana State University

4:00  **Altering task goal or adding information resources? Functions of vision in standing posture**  
I-Chieh Lee, University of Georgia; Matheus Pacheco, New York University; Karl Newell, University of Georgia

4:15  **The utility of the precrastination phenomenon to explain behaviours during a collision avoidance task**  
Michael Cinelli, Victoria Rapos, Natalie Snyder, Wilfrid Laurier University

4:30  **Comparison of vestibular function in sitting and standing**  
Jennifer Sansom, Central Michigan University; Allison Zilch, University of Michigan; Karen Lomond, Central Michigan University

**Motor Development Verbal Presentations – Relation Between Cognitive and Motor Skills** (Crestone B)  
**Moderator:** Laura Claxton, Purdue University

3:15  **Cognitive planning improved after cycling exercise in older adults with Down syndrome**  
Shannon Ringenbach, Nathaniel Arnold, Corinna Lopez, Simon Holzapfel, Liliana Rodriguez, Arizona State University
3:30 IQ and comorbidities influence psychological attributes and anxiety in children with Developmental Coordination Disorder
   Priscila Caçola, Ricardo Pimenta, University of Texas at Arlington

3:45 Improving fitness, executive functions, and perceived competence through an adapted gymnastics program of children with developmental disabilities
   Claire Bridges, Melissa Pangelinan, Mary Rudisill, Auburn University

4:00 Different and nuanced patterns of improvement in cognitive and motor functions in preschool children following a mastery motor skill intervention
   Julia Sassi, Jerraco Johnson, Brooke Converse, Madison Edwards, Danielle Wadsworth, Mary Rudisill, Melissa Pangelinan, Auburn University

4:15 Associations between gross motor skills and cognitive development in Australian toddlers
   Sanne L. C. Veldman, Rute Santos, Rachel A Jones, Eduarda Sousa-Sa, Anthony D Okely, University of Wollongong, Australia

4:30 From Wall Street to expertise development: Predicting the rise and demise of talent investment by using machine learning to identify 'game-changers'
   Benjamin David Jones, Bangor University, UK; Lew Hardy, Bangor University, UK; Gavin Peter Lawrence, Bangor University, UK; Ludmila Kuncheva, Bangor University, UK; Thomas Du Preez, Bangor University, UK; Raphael Brandon, The England & Wales Cricket Board, UK

4:45pm – 6:15pm  Poster Session #3 (3rd Floor Lobby)
   Moderators: Chris Aiken, New Mexico State University
               Arya Alami, California State University, Stanislaus
               Amanda Arnold, Purdue University
               Erica Bennett, University of British Columbia

See Pages 39-44 of this conference program for a list of the posters. Please set up posters by Noon. If you have an odd-numbered poster, please stand at your poster for the first hour. If you have an even-numbered poster, please stand at your poster for the second hour.

7:00pm  NASPSPA Banquet (Off-Site at the Performing Arts Center)

7:00pm – 7:45pm  Cocktails

8:00pm  Dinner (Dancing will follow dinner)
Motor Development

1. Effect of object manipulation skills (OMS) intervention on perceived competence among elementary school girls
   Diala Ammar, Mount Royal University; Dwayne Sheehan, Mount Royal University; Sonia Sheehan, Foundations for the Future Charter Academy

2. Fundamental motor skill proficiency of young adolescents
   Cheryl Coker, Plymouth State University

3. Relationship between actual and perceived motor competence, gender and BMI in adults
   Karla Chaves, Judith Jimenez, Universidad de Costa Rica, Costa Rica

4. Climbing onto the mountain of motor development: Can summer success help children’s fundamental motor skill status?
   Jacqueline Goodway, Ohio State University; Ruri Famelia, Ohio State University; Emi Tsuda, West Virginia University; Ally Hodges, Ohio State University; Ruth Chen, Ohio State University

5. Gross motor proficiency of 4 to 15-year-old Canadian children in Calgary, Alberta
   Dwayne Sheehan, Diala Ammar, Mount Royal University

6. The design, development and study protocol of Project FLAME - A multi-component, school-based, movement intervention in Ireland.
   Diarmuid Lester, Wesley O’Brien, University College Cork, Ireland

7. The relationship between children’s and adolescents’ actual and self-perceived motor competence: A systematic review and meta-analysis
   An De Meester, Ghent University, Belgium; Lisa Barnett, Deakin University, Australia; Ali Brian, University of South Carolina; Megan Irwin, University of South Carolina; Femke Van Duyse, Ghent University, Belgium; David Stodden, University of South Carolina; Eva D’Hondt, Vrije Universiteit Brussel, Belgium; Judith Jimenez, University of Costa Rica, Costa Rica; Leah Robinson, University of Michigan; Matthieu Lenoir, Ghent University, Belgium; Leen Haerens, Ghent University, Belgium

8. Estimation of typical duration of infant activities across a full day
   Avi Borad, Ivan Trujillo-Priego, Marcelo Rosales, Beth Smith, University of Southern California

9. Self-touch: The origin of reaching emergence in infancy
   John P. Connell, Abigail DiMercurio, Matthew Clark, Daniela Corbetta, University of Tennessee

10. Unlocking the potential of infant motor and perceptual behavior: Data collections at home
    Anastasia Kyvelidou, Creighton University

11. Neural oscillatory activity in the motor cortices correlates with developmental age and motor performance
    Roshelle Hoffman, Max Kurz, Tony Wilson, University of Nebraska Medical Center
12. Getting Ireland’s children moving: Examining fundamental movement skills in Irish school children as a key component for physical literacy  
   Stephen Behan, Sarahjane Belton, Cameron Peers, Noel O’Connor, Johann Issartel, Dublin City University, Ireland

13. Comparison of unipedal balance performance in young male soccer players: Role of age and balance task condition  
   Stephan Panzer, Saarland University, Germany; Peter Leinen, Saarland University, Germany; Thomas Muehlbauer, University of Duisburg-Essen, Germany

14. Differences in physical performance and physical activity among students participating in organized sports  
   Kasper Salin, Mikko Huhtiniemi, Timo Jaakkola, University of Jyväskylä, Finland

Motor Learning and Control

15. The effects of using attentional focus in a virtual reality environment  
   Louisa D Raisbeck, University of North Carolina Greensboro; Masahiro Yamada, The University of North Carolina Greensboro; Nikita A Kuznetsov, Louisiana State University

16. The impact of autonomy of support on attentional focus during instruction in balance tasks  
   Mackenzie Pierson, Masa Yamada, Louisa Raisbeck, University of North Carolina at Greensboro

17. The influence of attentional focus instructions on the learning of a balance task in individuals with visual impairments  
   Reza Abdollahipour, Palacky University Olomouc, Czech Republic; William Land, University of Texas at San Antonio; Ana Cereser, Federal University of Pelotas, Brazil; Suzete Chiviacowsky, Federal University of Pelotas, Brazil

18. The effect of attentional focus instruction on mechanics and performance  
   Masahiro Yamada, Louisa Raisbeck, University of North Carolina at Greensboro

19. Effect of attentional focus in track sprint start  
   Jie Song, Kuo-Liang Chuang, Yeou-Teh Liu, National Taiwan Normal University, Taiwan

20. Considering the effect of process and outcome oriented attentional focus cues  
   Kevin A Becker, Nick A Levine, Emily D Herbst, Texas Woman’s University

21. Gait, executive function, and falling in older adults  
   Tyler K. Aisner, Louisiana State University; Matthew R. Calamia, Louisiana State University; Jeffrey N. Keller, Pennington Biomedical Research Center; Robert M. Brouillette, Pennington Biomedical Research Center; Arend W. A. Van Gemmert, Louisiana State University

22. Analysis of gait while overcoming an obstacle in exercise practicing and non-practicing elderly  
   Raquel de Melo Martins, Thiago Viana Camata, Bruno José Frederico Pimenta, Inara Marques, Universidade Estadual de Londrina, Brazil

23. Fractal gait training in older adults with auditory and visual cues  
   Ruth Stout, W.P. Carder, Christopher Rhea, University of North Carolina at Greensboro

24. Avoidance behaviours of young adults during a collision course with an approaching person  
   Lana Pfaff, Michael Cinelli, Wilfrid Laurier University
25. Performing a visual-motor stone-stepping task on a hard and compliant surface: Effect on balance and target accuracy  
   Nikki Aitcheson-Huehn, Wilfrid Laurier University

26. Effect of fatigue on a smartphone-based measure of dynamic balance control  
   Jordan Stafford, Jason Jakiela, Danielle Funk, Scott Ross, Louisa Raisbeck, Christopher Rhea, University of North Carolina at Greensboro

27. Discovering new methods for improving balance over varied conditions  
   Diana Avans, Nicole Dunn, Michael Merryman, Jason Hoogsteen, Vanguard University of Southern California

28. Comparison of postural stability of college students with and without Autism Spectrum Disorder  
   Teri Todd, California State University, Northridge; Mache Meiissa, California State University, Chico; Kyle Geary, California State University, Northridge; Brian Rios, California State University, Northridge; Michael Salazar, California State University, Northridge; Danielle Jarvis, California State University, Northridge

29. A constraints-based approach to influencing kinematics of the golf swing: Implications for instruction  
   Will Wu, Long Beach State University; Terry Rowles, Sports Performance University; Phil Cheetham, United States Olympic Committee; Sasho Mackenzie, St. Francis Xavier University; Mike Adams, Bioswing Dynamics

30. Contextual interference effect on acquisition and transfer in fundamental motor skills in young-adults  
   Judith Jimenez, University of Costa Rica, Costa Rica; Maria Morera, National University of Costa Rica, Costa Rica

31. The effect of outcome estimation specificity on motor practice  
   William Marshall Land, Sonny Garcia, Alberto Cordova, Wan Xiang Yao, University of Texas at San Antonio

32. Relatedness affects dopaminergic activity and motor learning  
   Suzete Chiviacowsky, Universidade Federal de Pelotas, Brazil; Natália Harter, Universidade Federal de Pelotas, Brazil; Reza Abdollahipour, Palacky University Olomouc, Czech Republic

33. Learner-controlled pace of practice in isolation does not yield the self-control effect  
   Phillip G. Post, Christopher A. Aiken, Michael C. Hout, Jessica Madrid, New Mexico State University

34. Varying self-controlled frequency of modeling schedules does not affect scores on cognitive representation assessments of a pirouette  
   Laura St. Germain, Molly Brillinger, Hilary Cotnam, Diane M. Ste-Marie, University of Ottawa

35. Learner controlled amount of practice with fixed inter-trial interval benefits learning  
   Christopher A. Aiken, Phillip G. Post, Michael C. Hout, Jessica Madrid, New Mexico State University

36. Evaluation of feedback helpfulness enhances skill acquisition during yoked feedback condition  
   Joao A. C. Barros, California State University Fullerton; Erika G. Mora, Louisiana State University; Elia Garcia, California State University Fullerton; Elia Chavez, California State University Fullerton; Robert Blackwood, California State University Fullerton

37. Do you see what I see? Neuroactivity breadth and depth differentiate good movement imagers from those self-reporting lower abilities  
   Brian Seiler, Charleston Southern University; Roger Newman-Norlud, University of South Carolina; Ryan Sacko, University of South Carolina; Samantha R. Weber, University of South Carolina; Makayla Gibson, University of South Carolina; Eva V. Monsma, University of South Carolina
38. **Local muscle fatigue increases motor time in fractionated reaction time**  
Zongtao Li, Qufu Normal University, China; Qin Lai, Wayne State University, USA; Jinhai Sun, Shandong University, China

39. **Effects of muscle size and sex on fractionated reaction time**  
Ronald Benedict, Union College; Qin Lai, Wayne State University

40. **The effect of movement complexity and limb selection on the performance of an audiovisual choice reaction time task**  
McKenna JM Brown, University of Manitoba; Jessica Sutton, University of Manitoba; Ilana D Naiman, University of Toronto; Cheryl M Glazebrook, University of Manitoba

41. **Discrimination reaction time and decision making**  
Kaitlyn Downing, Emma Chase, Yuhua Li, University of Memphis

42. **The effect of exercise on a choice reaction task in an athletic population**  
Jaime Mitchell, Michael Cinelli, Wilfrid Laurier University

**Sport and Exercise Psychology**

43. **Exploring the role of trait characteristics underlying variable affective responses to exercise**  
Leighton Jones, Sheffield Hallam University, UK; Jasmin Hutchinson, Springfield College; Elizabeth Mullin, Springfield College

44. **Perceptions of exertion and affect during different physical and sedentary activities in children**  
Chloe Bedard, McMaster University; Emily Bremer, McMaster University; Jeffrey D. Graham, McMaster University; Daniele, University of Ottawa Heart Institute; John Cairney, University of Toronto

45. **Attentional focus manipulations on affective, exertional, and physiological responses to maximal exercise**  
Kristina Muniz, Rutgers University; Christopher Brush, Rutgers University; Peter Ehmann, Rutgers University; Ryan Olson, University of North Texas; Anthony Bocchine Rutgers University; Brandon Alderman, Rutgers University

46. **Nudging beyond the default: Prompting exercisers to increase pleasure and enjoyment increases experienced and remembered pleasure and enjoyment**  
Zachary Zenko, Duke University; Rachel Kahn, Duke University; Jasmin Hutchinson, Springfield College; Leighton Jones, Sheffield Hallam University

47. **Obesity and cardiovascular fitness are associated with executive function in young adults**  
Tai-Fen Song, Feng-Tzu Chen, Chien-Heng Chu, Yu-Kai Chang, National Taiwan Sport University, Taiwan

48. **Examining associations between affective states and physiological responses before, during, and after competitive cycling time trials**  
Paul Anthony Davis, Umeå University, Sweden; Andreas Stenling, Umeå University, Sweden

49. **Aging, men, and body image: How men aged 65+ perceive, experience, and manage their aging bodies**  
Erica Bennett, Laura Hurd Clarke, Peter Crocker, The University of British Columbia

50. **Shifting the mirror: Meta-perceptions, body image and objectification predict social physique anxiety— and clothing matters.**  
Eva V. Monsma, Rachel Burns, Mall Cassandra, University of South Carolina
51. Multidimensional associations of drive for muscularity in adult men  
   Nick SantaBarbara, Sanaz Nosrat, James Whitworth, Mark Louie, Chris Webster, Joseph Ciccolo, Teachers College Columbia University

52. The muscular ideal: Measuring muscle dysmorphia in weightlifters and athletes  
   Diana Avans, Rebecca Folkesson, Sierra Starke, Vanguard University of Southern California

53. Effects of self-control exertion on mental fatigue and perceived exertion during whole-body exercise  
   Jason Langvee, Sheereen Harris, Denver Brown, Steven Bray, McMaster University

54. Self-control, social support, and burnout among collegiate athletes: A prospective analysis  
   Jessie N. Stapleton, Missouri Baptist University; Molly V. Josephs, Southern Illinois University Edwardsville; Paul Saville, Azusa Pacific University

55. Perceived coaching behaviors and athlete burnout: The mediating effects of team communication and the coach-athlete relationship  
   Hun-Hyuk Choi, Korean National University of Education, South Korea; Yong-Jin Yoon, Yonsei University, South Korea; Seongkwan Cho, Texas A&M International University; Jung-Taek Shin, Dong-eui University, South Korea

56. Why specialize? Impact of athletes’ reasons for specializing on psychological outcomes  
   Shelby Waldron, J.D. DeFreese, Brian Pietrosimone, Johna Register-Mihalik, Nikki Barczak, University of North Carolina at Chapel Hill

57. Moral disengagement during injury evaluations among National Collegiate Athletic Association (NCAA) athletic trainers  
   Ross Budziszewski, Utah State University; Matthew Vierimaa, Utah State University; Scott Graupensperger, The Pennsylvania State University; Marcus Myers, Utah State University

58. Influences of nonverbal behavior on outcome expectations and performance outcomes in a real-world soccer penalty scenario  
   Kirstin Seiler, University of Bern, Switzerland; Geoffrey Schweizer, University of Heidelberg, Germany; Roland Seiler, University of Bern, Switzerland

59. The effect of non-verbal behavior and game context on expectations of success and psychological attributes  
   Mishka Blacker, Parmida Razavi, Philip Sullivan, Brock University

60. Group-based physical activity for older adults: Functional fitness and physical health outcomes in a randomized controlled trial  
   Geralyn R. Ruissen, University of British Columbia; Samantha M. Harden, Virginia Tech; Svenja A. Wolf, University of Amsterdam, The Netherlands; A. William Sheel, University of British Columbia; Ryan E. Rhodes, University of Victoria; Paul A. Estabrooks, University of Nebraska; William L. Dunlop, University of California, Riverside; Yan Liu, University of British Columbia; Mark R. Beauchamp, University of British Columbia

61. Coaching climate, needs satisfaction, and personal and social responsibility among young soccer participants  
   Lindsay Kipp, Texas State University; Nicole Bolter, San Francisco State University

62. Moving Well-Being Well: Evidence and background to the development of the MWBW physical literacy intervention for primary school children  
   Cameron Peers, Sarahjane Belton, Stephen Behan, Noel O’Connor, Johann Issartel, Dublin City University, Ireland
63. 'Gaelic4Girls' for increased physical activity participation - a multi-component, pilot intervention: Study design and protocol
Orlagh Farmer, Wesley O’ Brien, University College Cork, Ireland

64. Influence of a running training program on exercise self-regulation beliefs
Teri Hepler, Naoko Aminaka, University of Wisconsin-La Crosse

65. Experiences of peers and peer-mentors during a peer-mentor physical activity program for college students with Autism Spectrum Disorder
Teri Todd, Nancy Miodrag, Monica Caris, Bordin Endinjok, Erick Perez, California State University, Northridge

66. Differences in character strengths use and associations with optimal functioning across contexts
Cheryl Stuntz, St. Lawrence University

67. Investigating birthplace effects in US collegiate and professional men’s basketball
Matthew Vierimaa, Utah State University; David John Hancock, Indiana University Kokomo; Ross Budziszewski, Utah State University

68. Gender differences in Division II collegiate athletes’ dietary supplement use, sources of information, and motivations to use dietary supplements
Ariel Fralick, Robyn Braun, University of Texas of the Permian Basin

69. Exploring the relationship between aerobic fitness and activation of the locus-coeruleus
Madison C. Chandler, Amanda L. McGowan, Jan W. Brascamp, Matthew B. Pontifex, Michigan State University

70. A longitudinal investigation of athletic buoyancy and emotions in university club-sport athletes
Jackie V. Calhoun, Alex C. Garn, Louisiana State University

71. Performance and learning of a visual-motor tracking task as a function of motivational orientation and motivational climate
Cameron Olsen, Breanna Studenka, Travis Dorsch, Ross Budziszewski, Matthew Vierimaa, Richard Gordin, Utah State University

72. The effects of perceptual and cognitive interference during the preparation and execution of the golf swing
Leo Roberts, Mervyn Jackson, Ian Grundy, RMIT, Australia

73. The relationship between intrinsic and extrinsic religion and competitive anxiety
Amanda Clark, Leilani Madrigal, Alison Ede, Tiffanye Vargas, California State University Long Beach

74. Fun, failure, and fulfillment: A case study approach to informal athlete leadership in minor league baseball
Philip D. Imholte, Springfield College; Jedediah E. Blanton, University of Tennessee; Michelle M. McAlarnen, Minnesota State University, Mankato

75. Selective predictors of competitive state anxiety dimensions during high stakes in elite competition
John Elvis Hagan Jnr., Dietmar Pollmann, Schack Thomas, Bielefeld University, Germany

76. The roles of contextual priors and kinematic information during anticipation: Toward a Bayesian integration model
N. Viktor Gredin, Brunel University London, UK; Daniel T. Bishop, Brunel University London, UK; David P. Broadbent, Brunel University London, UK; A. Mark Williams, University of Utah
77. Training histories and developmental trajectories of Australian para table tennis athletes
   Nima Dehghansai, York University; Ross Pinder, Australian Paralympic Committee, Australia; Joseph Baker, York University

78. Does recess quality matter? Differences in physical activity, student engagement, and student perceptions
   William Massey, Oregon State University; Megan Stellino, University of Northern Colorado; Jeremy Gorgas, University of Wisconsin-Milwaukee

79. Consistency of maintaining physical activity guidelines as a predictor of health-related quality of life
   Navin Kaushal, Béatrice Bérubé, Louis Bherer, University of Montreal

80. Comparing accelerometry and self-report when measuring changes to sedentary behavior in the workplace
   Dwayne Sheehan, Mount Royal University; Emily Johnson, University of British Columbia; Diala Ammar, Mount Royal University

81. The psychological and physiological effects of completing a half-marathon on homeless individuals
   Christopher Patterson, Azusa Pacific University; Andrew Kim, Azusa Pacific University; Noha Daher, Loma linda University

82. Trait mindfulness as a moderator of green exercise and attention restoration
   Ford Dyke, Jence Rhoads, Tristan Hall, Matthew Miller, Auburn University

83. Having chronic pain and trying to be active: Is resiliency related to differences in adherence-related psychosocial factors and physical activity?
   Miranda Cary, University of Saskatchewan; Danielle Brittain, Colorado School of Public Health at the University of Northern Colorado; Nancy Gyurcsik, University of Saskatchewan

84. An investigation of Canadian University sport coaches’ awareness and use of motivational interviewing
   Colin M Wierts, University of British Columbia; Philip M Wilson, Brock University; Diane E Mack, Brock University

85. Exploring the relationship between athletes’ self-compassion and perceptions of their teammates’ self-compassion
   Alyson J. Crozier, University of South Australia, Australia; Amber D. Mosewich, University of Alberta; Leah J. Ferguson, University of Saskatchewan

86. Proposed sources of coaching efficacy: A meta-analysis
   Sung Eun Park, University of Miami; Nicholas Myers, Michigan State University; Soyeon Ahn, University of Miami; Seungmin Lee, Michigan State University; Philip Sullivan, Brock University; Deborah Feltz, Michigan State University

87. Examining the factor structure of a survey of adult-oriented coaching practices
   Bettina Callary, Cape Breton University; Scott Rathwell, University of Lethbridge; Bradley W Young, University of Ottawa

88. Mental health literacy in university coaches and athletic therapists
   Jessica Murphy, Philip Sullivan, Brock University

89. Mental and physical health factors influence exercise-induced cortisol responses in college students
   Robyn Feiss, Cody Haun, Danielle Wadsworth, Melissa Pangelinan, Auburn University
90. Investigating collegiate student-athlete well-being: A qualitative study  
Brian Souza, Framingham State University; David Schary, Winthrop University

91. Examining the overall wellness of college student-athletes  
Shane Warehime, Danae Dinkel, University of Nebraska at Omaha

92. The association among dispositional mindfulness, mental skill, flow and performance  
Jui-Ti Nien, Chih-Han Wu, Sheng-Hsien Feng, Wen-Hao Chiu, Yu-Kai Chang, National Taiwan Sport University, Taiwan

93. The effect of brain synchronization training on golf putting performance  
Debra Crews, Paul Karoly, Arizona State University
Poster Session #2 – Friday, June 22nd, 2018

Motor Development

1. Dimension identification and item reduction in the ALESA: A pilot study in female youth athletes
   Sz-Yan Wu, Christie Powell, Jody Jensen, University of Texas at Austin

2. Analysis of children’s preference on two assessments of perceived motor competence
   Kara K. Palmer, Carissa Wengrovius, Indica Sur, Leah E. Robinson, University of Michigan

3. Inter- and intra-rater reliability during live- and video-coding of the TGMD-3
   E. Andrew Pitchford, Iowa State University; Kara K. Palmer, University of Michigan; Yuemei Lu, University of Michigan; Kerry Winkelseth, University of Michigan; Dale A. Ulrich, University of Michigan

4. Comparison of preschoolers’ PA between hip and ankle accelerometry: A pilot study
   Katherine M. Chinn, Kara K. Palmer, Leah E. Robinson, University of Michigan

5. Physical activity during different physical education instruction environments
   Sanne LC Veldman, Katherine Q Andrews, Leah E Robinson, University of Michigan

6. Concurrent validity of total body developmental sequences: A preliminary investigation
   Jenna R. Fisher, University of South Carolina; Ali Brian, University of South Carolina; Sally Taunton, University of South Carolina; Ryan S. Sacko, University of South Carolina; Jacqueline D. Goodway, Ohio State University; Rick Ferkel, Central Michigan University; Larissa True, State University of New York Cortland; David F. Stodden, University of South Carolina

7. Psychometrics of the attitudes toward self-directed mobility scale
   Samuel W. Logan, Oregon State University; Kathleen R. Bogart, Oregon State University; Samantha M. Ross, Oregon State University; Heather A. Feldner, University of Washington; Christina M. Hospodar, Oregon State University; Michele Catena, Oregon State University; Samantha Ligman, Oregon State University

8. Surveying caregivers about device use and infant position using a smartphone-based application: Response rates from a pilot study
   Marcelo Rosales, University of Southern California; Tanya Tripathi, Virginia Commonwealth University; Stacey Dusing, Virginia Commonwealth University; Beth Smith, University of Southern California

9. A comparison of sleep behavior, physical activity, feeding, and weight in 6-month old infants
   Gabriela Zott, Isabella Felzer-Kim, Chelsea Adkins, Janet Hauck, Michigan State University

10. Effects of socioeconomic status on infants’ motor development and physical activity
    Do Kyeong Lee, California State University Fullerton

11. Physical activity participation during preschool health-related summer camps
    Zadie I. Franklin, Angela Barnes, E. Kipling Webster, Louisiana State University
12. **Reduction of deltoid co-contraction during the development of arm swing control in children: Preliminary results**  
   *Michael MacLellan, Lauren Carriere, Louisiana State University*

13. **The ability of the Movement Assessment for Children to predict fine and gross motor development in children at a five and a half year follow up**  
   *Lauren Christianson, Brady Houbrick, Elizabeth Peterson, Joe Weber, Julia Looper, Lynette Chandler, University of Puget Sound*

14. **Pupil dilation, motor imagery, and cognitive load**  
   *Alberto Cordova, Elena Camargo, William Land, Wan Xiang Yao, University of Texas - San Antonio*

15. **Validity and reliability of gross motor skill assessments in typically developing children and adolescents**  
   *Ryan M. Hulteen, Australian Catholic University, Australia; Larissa True, State University of New York, Cortland; Natalie Lander, Deakin University, Australia; Lisa Barnett, Deakin University, Australia; Borja del Pozo Cruz, Australian Catholic University, Australia; Chris Lonsdale, Australian Catholic University, Australia*

**Motor Learning and Control**

16. **Examining the impact of physical activity on motor proficiency and cognition in children with autism**  
   *Choi Yeung Tse, Hong Paul Lee, K. H. Wong, The Education University of Hong Kong, China*

17. **Reactive driving performance following stroke**  
   *Victoria Zablocki, Colorado State University; Prakruti Patel, Colorado State University; Evangelos Christou, University of Florida; Neha Lodha, Colorado State University*

18. **Are cognitive-motor integration deficits in children with concussion history linked to motor learning deficits?**  
   *Marc Dalecki, Louisiana State University; Jessica Usand, Louisiana State University; Lauren Sergio, York University; Arend Van Gemmert, Louisiana State University*

19. **Mental workload assessment during simulated upper extremity prosthetic performance under various conditions of cognitive and motor challenge**  
   *Christopher Gaskins, University of Maryland; Kimberly L. Kontson, U.S. Food and Drug Administration; Emma P. Shaw, University of Maryland; Isabelle M. Shuggi, University of Maryland; Maria J. Ayoub, University of Maryland; Jeremy C. Rietschel, Veteran’s Health Administration; Matthew W. Miller, Auburn University; Rodolphe J. Gentili, University of Maryland*

20. **The state of behavior change techniques in virtual reality rehabilitation of neurologic populations: A systematic review**  
   *Danielle Felsberg, Jaclyn Maher, Christopher Rhea, University of North Carolina at Greensboro*

21. **Medication and trial duration affect posture and pointing during a standing repetitive pointing task in Parkinson’s Disease**  
   *Deborah Jehu, Oregon Health & Science University; Hiram Cantu, McGill University; Allen Hill, University of Ottawa; Caroline Paquette, McGill University; Julie Cote, McGill University; Julie Nantel, University of Ottawa*

22. **Getting into the swing of things during childhood: A hand-eye coordination paradigm**  
   *Johann Issartel, Dublin City University, Ireland; David Gaul, Institute of Technology Blanchardstown, Ireland*
23. **Precrastination and procrastination effects appear in a reach-to-grasp task**  
   Jarrod Blinch, Zack Foster, Texas Tech University

24. **Upper limb muscle synergy for damping behavior during object transport in healthy young individuals**  
   Ahyoung Song, Louisiana State University; Sara Winges, University of Northern Colorado; Michael MacLellan, Louisiana State University

25. **Application of cross-recurrence quantification analysis to characterize finger entrainment during rhythmic tapping**  
   Sara A. Winges, University of Northern Colorado; Prasanna A. Acharya, Louisiana State University; Nikita A. Kuznetsov, Louisiana State University

26. **The effect of open and closed kinetic chain exercise on dynamic knee valgus during activity in women**  
   Kelsi Wood, University of Cincinnati; William Berg, Miami University; Nick Salcedo, Mercy Hospital; Mark Walsh, Miami University; Kelsey Biller, Ohio University

27. **Lower extremity coordination patterns between traditional and cluster training during back squat**  
   Kelci B. Hannan, Texas Christian University; John D. Mata, Texas Christian University; Jonathan M. Oliver, Texas Christian University; James M. Bothwell, Texas Health Ben Hogan Sports Medicine; Adam C. King, Texas Christian University

28. **Investigating the whole body coordination patterns of 3 ball juggling**  
   Pei-Yu Hsieh, Yi-Xuan Lin, Kuo-Liang Chuang, Yeou-Teh Liu, National Taiwan Normal University, Taiwan

29. **The role of actor vs observer in reciprocal upper extremity sine wave tracking**  
   Jason Boyle, University of Texas at El Paso; Deanna Kennedy, Texas A&M University; Fabricio Saucedo, University of Texas at El Paso; Patrick Cereceres, University of Texas at El Paso

30. **Random, timed and self-paced: How preparation time affects the loading of the body prior to flight in a two-footed forward leap**  
   Dorothy Stewart, Fabricio Saucedo, Patrick Cereceres, Jason Boyle, University of Texas at El Paso

31. **Characteristics of movement variability in time minimization tasks and time matching tasks**  
   Jui-Chun Fang, Tsung-Yu Hsieh, Ya-Chun Chen, Yeou-Teh Liu, National Taiwan Normal University, Taiwan

32. **Submovement as a function of space-time constraints in discrete aiming tasks**  
   Ya-Chun Chen, Tsung-Yu Hsieh, Jui-Chun Fang, Yeou-Teh Liu, National Taiwan Normal University, Taiwan

33. **Using joint entropy to discriminate between time matching and time minimization movement accuracy tasks**  
   Tsung-Yu Hsieh, National Taiwan Normal University, Taiwan; Yeou-Teh Liu, National Taiwan Normal University, Taiwan; Karl Newell, University of Georgia

34. **Posture control on movement variability in discrete line drawing task**  
   Hock Leong Chew, Yeou-Teh Liu, Tsung-Yu Hsieh, National Taiwan Normal University, Taiwan

35. **Upper selection in a preferential reaching task: The influence of lateralization and balance control**  
   Jessie Tucker, Michael Cinelli, Pamela Bryden, Wilfrid Laurier University
36. **Cortical correlates underlying changes in mental workload and motor performance during multiple training sessions under various levels of challenge**

*Kyle Jaquess, University of Maryland; Li-Chuan Lo, University of Maryland; Hyuk Oh, University of Maryland; Calvin Lu, University of Maryland; Andrew Ginsberg, University of Maryland; Ying Ying Tan, Defense Science and Technology Agency, Singapore; Keith Lohse, University of Utah; Matthew Miller, Auburn University; Bradley Hatfield, University of Maryland; Rodolphe Gentili, University of Maryland*

37. **Evaluation of cerebral cortical networking as a measure of cognitive workload during dual-task walking under various levels of challenge**

*Emma P. Shaw, University of Maryland; Jeremy C. Rietschel, Veteran’s Health Administration; Isabelle M. Shuggi, University of Maryland; Yishi Xing, University of Maryland; Brad D. Hendershot, Walter Reed National Military Medical Center; Alison L. Pruziner, Walter Reed National Military Medical Center; Shuo Chen, University of Maryland School of Medicine; Matthew W. Miller, Auburn University; Bradley D. Hatfield, University of Maryland; Rodolphe J. Gentili, University of Maryland*

38. **Changes in motor performance, mental workload, and self-efficacy throughout longitudinal training of arm reaching movements**

*Isabelle M. Shuggi, University of Maryland; Emma P. Shaw, University of Maryland; Helena Wu, University of Maryland; Arianna Moreno, University of Maryland; Hyuk Oh, University of Maryland; Patricia A. Shewokis, Drexel University; Rodolphe J. Gentili, University of Maryland*

39. **Look out! How do footballers’ search for opponents during evasive tasks?**

*Stephen Tidman, Jacqueline Alderson, Paul Bourke, Brendan Lay, University of Western Australia, Australia*

40. **A virtual environment can be as good as a real one to improve real-world skill when hitting a ball**

*David Mann, Maaikje Dunnink, Robin Bense, Jeltje Loomans, Vrije Universiteit Amsterdam, Netherlands*

41. **Testing the functionality of peripheral vision in a mixed-methods football field study**

*Christian Vater, Lukas Magnaguagno, Ernst-Joachim Hossner, University of Bern, Germany*

42. **Quiet eye and motor performance – Testing the “optimal duration” hypothesis**

*André Klostermann, Ernst-Joachim Hossner, University of Bern, German*

43. **Quiet eye duration is dependent on the margin for error: A field test of skilled rugby goal kickers**

*Robin C. Jackson Will Bishop, Luke Jennings, Loughborough University, UK*

44. **A Comparison of two techniques for obtaining 2-D error scores**

*Ben Meyer, Shippensburg University*

**Sport and Exercise Psychology**

45. **The effects of acute exercise on driving performance and executive functions in healthy older adults**

*Jean-Charles Lebeau, Ball State University; Justin Mason, Florida State University; Nelson Roque, Florida State University; Selen Razon, West Chester University; Gershon Tenenbaum, Florida State University*

46. **Effects of a 6-week classroom-based physical activity intervention on executive functioning and math performance in children**

*Jeffrey Graham, McMaster University; Emily Bremer, McMaster University; John Cairney, University of Toronto*

47. **When efficacy and enjoyment collide: Incorporating low-intensity exercise breaks into learning**

*Michelle Ogrodnik, Barbara Fenesi, Brynley Hanson-Wright, Joe Kim, Jennifer Heisz, McMaster University*
48. **Child affective and working memory responses to social exclusion differ by aerobic fitness level**  
   Anthony G. Delli Paoli, Manhattanville College; Alan L. Smith, Michigan State University; Matthew B. Pontifex, Michigan State University; Jason S. Moser, Michigan State University

49. **The relation of physical activity, aerobic fitness and cognitive function in HIV+ adolescents and young adults on ART**  
   Leapetswe Malet, Michigan State University; Dawn Tladi, University of Botswana, Botswana; Jennifer Etnier, University of North Carolina, Greensboro; Jerry Makhanda, Botswana Baylor Children’s Clinical Centre of Excellence, Botswana; Gabriel Anabwani, Botswana Baylor Children’s Clinical Centre of Excellence, Botswana; Charlene Compher, University of Pennsylvania

50. **Cycling as a means of improving inhibitory control and maintaining brain function and academic performance in 9- to 10-year-old children**  
   Caroline C. Meadows, University of North Carolina at Greensboro; Charles H. Hillman, Northeastern University; Eric S. Drollette, University of North Carolina at Greensboro

51. **Exercise types and white matter microstructure in older adults: A diffusion tensor imaging study**  
   Feng-Tzu Chen, Tai-Fen Song, Kao-Teng Yang, Chun-Chih Wang, Yu-Kai Chang, National Taiwan Sport University, Taiwan

52. **Exploring direct and indirect effects of motivational climate among university students in a group fitness setting**  
   Karynn Glover, E. Whitney G. Moore, Wayne State University

53. **Using ecological theory to predict sedentary behavior in inner-city middle school aged children**  
   Erin E. Snapp, Jeffrey J. Martin, E. Whitney G. Moore, Nate McCaughtry, Wayne State University

54. **Comparing exercise class ownership and autonomy support among university group exercise class participants**  
   E. Whitney G. Moore, Karynn Glover, Valerie Smith, Wayne State University

55. **Gender differences in college students’ perceptions of motivational class climates, ownership, enjoyment, and empowerment in exercise**  
   Valerie Smith, E. Whitney G. Moore, Wayne State University

56. **The influences of physical self-perception and social relationship to intrinsic motivation for physical education**  
   Meei-Hwa Chern, National Changhua University of Education, Taiwan

57. **Testing the processes by which yoga may support physical activity motivation**  
   Anne Cox, Sarah Ullrich-French, Bruce Austin, Washington State University

58. **Using the Response to Challenge Scale (RCS) to measure self-regulation in toddlers during physically active play**  
   Kimberley Lakes, Candice Taylor Lucas, Shlomit Radom-Aizik, Fadia Haddad, Annamarie Stehli, Kayla Guzman, Dan Cooper, University of California, Irvine

59. **Efficacy of the fun for wellness online intervention to promote well-being actions**  
   Nicholas D. Myers, Michigan State University; Samantha Dietz, University of Miami; Isaac Prilleltensky, University of Miami; Ora Prilleltensky, University of Miami; Adam McMahon; Carolyn L. Rubenstein, University of Miami; Seungmin Lee, Michigan State University
60. **Gamification in healthcare and physical activity promotion contexts**  
   *Winston Kennedy, Oregon State University; Anthony Pellicone, New York University; Samuel Logan, Oregon State University*

61. **Stand up and drive! Using modified ride-on cars with different postures for enhancing mobility and socialization in children with disabilities**  
   *Yu-Hsin Hsieh, Chang Gung University, Taiwan.*

62. **I ride with MS: Motivation, benefits, and quality of life outcomes in bike MS participants with Multiple Sclerosis**  
   *Kimberly Fasczewski, Blair Anderes, Katie Campbell, Hannah Cook, Appalachian State University*

63. **Examining the impact of behavioral counselling on psychosocial mediators for physical activity among children with epilepsy**  
   *Denver Brown, McMaster University; Nadilein Mahlberg, McMaster University; Daniela Pohl, Children’s Hospital of Eastern Ontario; Brian Timmons, McMaster University; Steven Bray, McMaster University; David Streiner, McMaster University; Mark Ferro, University of Waterloo; Sabrina Hamer, Children’s Hospital of Eastern Ontario Research Institute; Peter Rosenbaum, McMaster University; Gabriel Ronen, McMaster University*

64. **Increasing physical activity levels among nurses through a web-based intervention: What type of motivation plays a role?**  
   *Jennifer Brunet, Heather Tulloch, Emily Wolfe-Phillips, Robert Reid, Andrew Pipe, Jennifer Reed, University of Ottawa*

65. **Affect school, virya yoga, and compassion-focused therapy: A pilot study of an integrative group treatment, depression and anxiety**  
   *Markus Nyström, Umeå University, Sweden*

66. **Psychosocial factors on the upper extremity reintegration into life after hemiparetic stroke – A pilot study**  
   *Shuya Chen, China Medical University, Taiwan; Chi-Wen Shao, Taiwan; Ching-Min Lin, Asia University, Taiwan; Yu-Ting Kuo, Asia University, Taiwan; Chia-Ming Chie, China Medical University, Taiwan; Wen-Dien Chang, China Medical University, Taiwan*

67. **Diversity in diversity research: A scoping review**  
   *Michael Godfrey, Wilfrid Laurier University; Jeemin Kim, Wilfrid Laurier University; Manon Eleure, École Normale Supérieur de Rennes, France; Mark Eys, Wilfrid Laurier University*

68. **Differences in pain coping cognitions among adults with chronic non-cancer pain who are inactive, insufficiently active, and sufficiently active**  
   *Miranda Cary, Nancy Gyurcsik, University of Saskatchewan*

69. **“A place where I belong:” The experiences of people with disabilities in a community-based dance class at Canada’s Royal Winnipeg Ballet School**  
   *Jacqueline C Ladwig, University of Manitoba; Cheryl M Glazebrook, University of Manitoba; Fiona Moola, University of Toronto*

70. **The effects of colors on gaze behavior in soccer penalties**  
   *Stijn Mentzel, University of Muenster, Germany; Till Utesch, University of Muenster, Germany; Linda Schücker, University of Muenster, Germany; Kilian Gattschalk, University of Muenster, Germany; Norbert Hagemann, University of Kassel, Germany; Bernd Strauss, University of Muenster, Germany*
71. A prospective study of skill development in elite soccer based on practice and play hours and coach ratings of skills  
   David Thomas Hendry, University of British Columbia; A. Mark Williams, University of Utah; Nicola, J. Hodges, University of British Columbia

72. Autonomy enhances movement efficiency  
   Takehiro Iwatsuki, James Navalta, Gabriele Wulf, University of Nevada

73. Talent identification errors in elite male basketball: A longitudinal examination of the influence of relative age and physical growth potential  
   Robert Brustad, University of Northern Colorado

74. When a team suddenly falls apart: Comparing athletes’, coaches’, and sport psychologists’ perceptions of causes of collective team collapse  
   Vivian Vanessa Wergin, Jürgen Beckmann, Technische Universität München, Germany

75. What and why young female dancers image  
   Irene L. Muir, Krista J. Munroe-Chandler, University of Windsor

76. Does physical activity moderate the associations between body mass index and self-perceptions in adolescent and young adult cancer survivors?  
   Amanda Wurz, Jennifer Brunet, University of Ottawa

77. “This doesn’t look too hard”: Sources of self-efficacy information on a novel puzzle task  
   Amber Shipherd, Texas A&M University - Kingsville

78. The relationship between state self-esteem and self-compassion over time  
   Urska Dobersek, University of Southern Indiana; Abbey Huffine, University of Southern Indiana; Mindy Mayol, University of Indianapolis; Lee Everett, University of Indianapolis

79. Exercise and physical self-esteem: A meta-analysis of recent research  
   Tao Xu, Bohai University, China; Huiyong Fan, Bohai University, China; Qiangguo Lv, Bohai University, China; Qin Lai, Wayne State University

80. Women athletes’ reported pre-season and early-season injury impact on training volume and perceived performance expectations  
   Margo E. K. Adam, University of Saskatchewan; Amber D. Mosewich, University of Alberta; Rachel L. Duckham, Deakin University, Australia; Kent C. Kowalski, University of Saskatchewan; Leah J. Ferguson, University of Saskatchewan

81. Investigating the possible positive effects of avoidance goals on goal attainment through effort  
   Keita Kinoshita, University of Ottawa; Eric MacIntosh, University of Ottawa; Shintaro Sato, Montclair State University; Terry Orlick, University of Ottawa

82. Group cohesion and relatedness as predictors of self-determined motivation and burnout in adolescent female athletes  
   Christine E. Pacewicz, Michigan State University; Nicole Vaughan, East Carolina University; Alan L. Smith, Michigan State University; Thomas D. Raedeke, East Carolina University

83. Knowledge of motivational interviewing among certified coaches in Canadian university sport  
   Colin M Wierts, University of British Columbia; Philip M Wilson, Brock University; Diane E Mack, Brock University
84. **Non-sport need satisfaction promotes elite athletes’ health and well-being: A cross-sectional survey and diary study**
Yannick Balk, Eindhoven University of Technology, Netherlands; Jan De Jonge, Eindhoven University of Technology, Netherlands; Sabine Geurts, Radboud University Nijmegen, Netherlands; Chris Lonsdale, Australian Catholic University, Australia

85. **Work-related stressors, health, and psychological well-being among sports coaches**
Faye Felicity Didymus, Leeds Beckett University, UK; Leanne Norman, Leeds Beckett University, UK; AJ Rankin-Wright, Leeds Beckett University, UK; Susanna Soler Prat, Institut Nacional d'Educació Física de Catalunya, Spain

86. **Mental practice and psychological health in stroke patients: A systematic review**
Vera Storm, Till Utesch, University of Münster, Germany

87. **Psychosocial consequences of parental involvement in youth sport: A systematic review of the literature**
Steffan R Berrow, Camilla J Knight, Joanne Hudson, Swansea University, UK

88. **Does level of sport participation impact parent academic involvement, academic self-efficacy, and students’ academic outcomes?**
Marshall X Grimm, Logan K Lyons, Josh R Novak, Travis E Dorsch, Utah State University

89. **The influence of parental support and pressure on youth sport passion**
Eric Martin, Boise State University; Laura Petranek, Boise State University; Brian Butki, Colorado State University

90. **Parent personality and child outcomes in youth sport**
Michael King, Travis Dorsch, Ryan Dunn, Lauren Prettyman, Utah State University

91. **A systematic review of the use and effectiveness of concussion education programs in youth sport**
Robyn Feiss, Molly Lutz, Justin Moody, Melissa Pangelinan, Auburn University

92. **Relationship among mindfulness, mental skills and mental toughness in martial arts athletes**
Chih-Han Wu, Jui-Ti Nien, Tai-Sheng Chen, Chen-Shuo Liu, Yu-Kai Chang, National Taiwan Sport University, Taiwan
Poster Session #3 – Saturday, June 23rd, 2018

Motor Development

1. Two-leg hopping and frequency matching in children with Down syndrome
   Matthew Beerse, Jianhua Wu, Georgia State University

2. Motor competence and executive function in children with Autism Spectrum Disorder
   Ting Liu, Texas State University

3. The influence of risk factors on motor competence, physical fitness and BMI in childhood
   Lena Henning, University of Muenster, Germany; Till Utesch, University of Muenster, Germany; Roland Naul, University of Muenster, Germany; Christine Graf, DSHS Köln, Germany; Dennis Dreiskämper, University of Muenster, Germany

4. Screen-time usage and fundamental motor skill competency in preschool children
   E. Kipling Webster, Louisiana State University; Amanda E. Staiano, Pennington Biomedical Research Center; Corby K. Martin, Pennington Biomedical Research Center; Amanda J. Weathers-Meyer, Louisiana State University

5. The influence of guided practice on overhand throwing competence in preschool children in a mastery motivational climate
   Jerraco Johnson, Mary Rudisill, Peter Hastie, Melissa Pangelinan, Julia Sassi, Auburn University

6. “You throw like a girl!”: Young children’s gender stereotypes about motor competence
   Sally Taunton, University of South Carolina; Kelly Lynn Mulvey, North Carolina State University; Ali Brian, University of South Carolina

7. Motor development in school-age children is associated with the home environment including socioeconomic status
   Priscila Caçola, University of Texas at Arlington; Luciana Ferreira, State University of Maringa; Ignacio Godinez, University of Texas at Arlington; Carl Gabbard, Texas A&M University; José Luiz Lopes Vieira, State University of Maringa

8. Age-related changes in visual MT/V5 cortical oscillations are associated with visuomotor task performance
   Jacy VerMaas-Hannan, University of Nebraska Medical Center

9. A longitudinal examination of a structured perceptual motor program
   C. Howard-Shaughnessy, Troy University; J.B. Sluder, Troy University; S. Taunton, University of South Carolina; A. Brian, University of South Carolina
Motor Learning and Control

10. Keep your “head” on the ball: The relationship between gaze behavior and temporal error in baseball batting in a virtual environment
Hiroki Nakamoto, National Institute of Fitness and Sport in Kanoya, Japan; Kazunobu Fukuhara, Tokyo Metropolitan University, Japan; David Mann, Vrije Universiteit Amsterdam, The Netherlands

11. The role of proximal body information in skilled anticipation: The effect of kinematic interchange on anticipatory judgments in tennis
Kazunobu Fukuhara, Tokyo Metropolitan University, Japan; Takahiro Higuchi, Tokyo Metropolitan University; Hiroki Nakamoto, National Institute of Fitness and Sports, Japan; David L. Mann, Vrije Universiteit Amsterdam, The Netherlands

12. Quiet eye is not responsive to throwing darts of different weights even when the weight differences can be perceived
Jonathan Marchetto, Robert Horn, Megan LaVacca, Montclair State University

13. Size perception and performance outcome in a dart-throwing task under psychological pressure
Yoshifumi Tanaka, Mukogawa Women’s University, Japan; Kenta Karakida, Osaka University of Health and Sport Sciences, Japan; Takayuki Murayama, Kanazawa University, Japan; Yufu M. Tanaka, Kindai University, Japan; Kana Goto, Mukogawa Women's University, Japan

14. Field location and player roles as constraints on emergent 1-vs-1 interpersonal patterns of play in football
Timo Pekka Laakso, University of Jyvaskyla, Finland; Bruno Travassos, Universidade da Beira Interior, Portugal; Jarmo Liukkonen, University of Jyvaskyla, Finland; Keith Davids, Sheffield Hallam University, UK

15. Dual-task training and dual-task performance in sequence learning
Stephan Panzer, Saarland University, Germany; Matthias Massing, Saarland University, Germany; Charles Shea, Texas A&M University

16. Differential effects of dual tasks across learning a finger-sequence
Felix Ehrlenpiel, Luan Mengkai, Technische Universität München, Germany

17. An acute bout of exercise can protect procedural memory
Jing Chen, Hakjoo Kim, Taewon Kim, David Wright, Texas A&M University

18. Representation and learning in manual action
Ludwig Vogel, Thomas Schack, Bielefeld University, Germany

19. The role of dynamic and structural cues for interference in action and perception
Fabian Helm, Goethe-University Frankfurt/Main, Germany; Stefan Kindermann, Justus-Liebig-University Giessen, Germany; Karen Zentgraf, Goethe-University Frankfurt/Main, Germany; Jörn Munzert, Department of Justus-Liebig-University Giessen, Germany

20. Motor imagery of single, double and joint actions
Nadja Schott, Carina Frommer, Melina Held, University of Stuttgart, Germany

21. Differences in subjective and objective motor imagery in children with Developmental Coordination Disorder
Chadwick Fuchs, Priscila Caçola, University of Texas at Arlington
22. Neuroactivity during imagery of the same movement delineates kinesthetic and visual movement imagery abilities as screened by questionnaires
Roger Newman-Norlund, University of South Carolina; Seiler Brian, Charleston Southern University; Ryan Sacko, University of South Carolina; Samantha R. Weber, University of South Carolina; Makayla Gibson, University of South Carolina; Eva Monsma, University of South Carolina

23. Balance as a predictor toward independent cycling
Jennifer Kavanagh, Johann Issartel, Kieran Moran, Dublin City University, Ireland

24. The effect of transcranial direct current stimulation on time to exhaustion performance in trained cyclists
Rhiannon Louise Cowan, University of Utah; Lisa Schafer, University of Brighton, UK; Nicholas Smeeton, University of Brighton, UK; Jeanne Dekkerle, University of Brighton, UK; James Wrightson, University of Calgary

25. Priming performance on a ball tossing task via movement contingent sensory effects
William Marshall Land, University of Texas at San Antonio

26. Animated instructional presentations can cause symptoms of motion sickness
Anthony Mayo, San Francisco State University; David Anderson, San Francisco State University; Thomas Stoffregen, University of Minnesota

27. Effectiveness of a novel target grid method for obtaining 2-D error scores
Ben Meyer, Shippensburg University

28. Proficient brain activity in superior golf putting performance: An insight from the EEG and psychomotor efficiency
Ming-Yang Cheng, Bielefeld University, Germany; Kuo-Pin Wang, National Taiwan Normal University, Taiwan; Dirk Koester, Bielefeld University, Germany; Tsung-Min Hung, National Taiwan Normal University, Taiwan; Thomas Schack, Bielefeld University, Germany

29. Response biases: The influence of the contralateral limb and head position
Deanna Kennedy, Charles Shea, Texas A&M University

**Sport and Exercise Psychology**

30. The effect of music on performance and affects: What’s next?
Nile Brandt, University of Utah; Selen Razon, West Chester University; Itay Basevitch, Anglia Ruskin; Gershon Tenenbaum, Florida State University

31. Differential effects of aging and aerobic fitness on memory
Allison Mizzi, Alexis Bullock, Jennifer Heisz, McMaster University

32. Cognitive and executive function measures used in pediatric exercise research: An analytical review
Kimberley Lakes, University of California, Irvine; Spyridoula Vazou, Iowa State University; Kavita Krishnan, University of California, Irvine; Arya Tavakolnia, University of California, Irvine; Irene Gonzales, University of California, Irvine; Shlomit Radom-Aizik, University of California, Irvine

33. An examination of movement-integrated learning in the college classroom
Michael Rhoads, Metropolitan State University of Denver; Rena Kirkland, Adams State University; Crystal Baker, Colorado Mesa University
34. The effect of an acute bout of physical activity on inhibitory control in individuals with Autism Spectrum Disorder  
Andrew C. Parks, University of Michigan; Isabella Felzer-Kim, Michigan State University; Janet L. Hauck, Michigan State University; Brooke R. Ingersoll, Michigan State University; Alan L. Smith, Michigan State University; Matthew B. Pontifex, Michigan State University

35. The effects of acute exercise on reward processing during a monetary gambling task  
Matthew Gooden, Kristina Muniz, Christopher Brush, Peter Ehmann, Anthony Bocchine, Brandon Alderman, Rutgers University

36. Does consumption of slow-releasing carbohydrates improve mental performance following exhaustive exercise?  
Gustavo Sandri Heidner, East Carolina University; Laurel Wentz, Appalachian State University; Jaclyn Farrior, East Carolina University; Callie Herman, East Carolina University; Rachel Dodson, East Carolina University; Nicholas Murray, East Carolina University

37. Associations among motivational climate, achievement goals, perceived competence, enjoyment, and anxiety within Finnish physical education students  
Mikko Huhtiniemi, Timo Jaakkola, University of Jyväskylä, Finland

38. Exploration into the barriers and facilitators of exercise adherence behaviours in patients with persistent musculoskeletal pain  
Laura Meade, Emma Godfrey, Lindsay Bearne, King's College London, UK

39. Self-determination theory and physical activity in Chinese adolescents  
Weiwei Ding, China University of Geosciences, China; Zhixiong Mao, Beijing Sport University, China; Qin Lai, Wayne State University

40. Associations among basic psychological needs, motivational regulations, enjoyment, and anxiety of Finnish physical education students  
Timo Jaakkola, Mikko Huhtiniemi, University of Jyväskylä, Finland

41. Sport, exercise, and performance psychologists as proxy-agents for exercise  
Caleb Campbell, Alison Ede, Tiffanye Vargas, Leilani Madrigal, California State University, Long Beach

42. Expanding our understanding of knowledge and beliefs about chronic pain and exercise among physiotherapists  
Mackenzie G. Marchant, University of Saskatchewan; Miranda A. Cary, University of Saskatchewan; Jenelle Zapski, University of Saskatchewan; Jocelyn E. Blouin, University of Saskatchewan; Nancy Gyurcsik, University of Saskatchewan; Danielle R. Brittain, University of Northern Colorado

43. Wearable technology to improve physical health of adults with chronic disease conditions: A systematic review and meta-analysis  
Megan Kirk Chang, Mohammad Amiri, Meysam Pirbaglou, Paul Ritvo, York University

44. Self-efficacy and body weight satisfaction predict physical activity and sedentary behaviors in HIV positive adolescents and young adults on ART  
Leapetswe Malete, Michigan State University; Tladi Dawn, University of Botswana, Botswana; Jennifer Etnier, University of North Carolina, Greensboro; Jerry Makhanda, Botswana Baylor Children’s Clinical Centre of Excellence; Gabriel Anabwani, Botswana Baylor Children’s Clinical Centre of Excellence; Charlene Compher, University of Pennsylvania
45. Development and validation of golf positive psychological capital questionnaire  
   Jung-eun Na, Ji-Hye Chung, Sookmyung Women’s University, South Korea
46. The development and validation of dancer resilience questionnaire  
   Eun Choi, Ji-Hye Chung, Mi-Sun Kim, Bo-Ram Lee, Sookmyung Women’s University, South Korea
47. A qualitative approach to identifying how mental toughness is characterized by high school coaches  
   Leilani Madrigal, Madison Hunt, Courtney Novak, Kiana Nua, Casee Wieber, Taylor Florentino, California State University Long Beach
48. Examining the psychometric properties of the MTS in high school athletes  
   Leilani Madrigal, California State University Long Beach; Sharon Hamill, California State University San Marcos; Kim Pulvers, California State University San Marcos; Devan Romero, California State University San Marcos
49. The effects of cognitive effort training on whole body physical exertion and perception of effort  
   Kira I Innes, McMaster University; Kathryn E Andrusko, Queen’s University; Steven R Bray, McMaster University
50. Gatekeepers’ experiences of hiring a sport psychologist: A phenomenological study  
   Toby H Woolway, Chris G Harwood, Loughborough University, UK
51. Grounded theoretical approach in the process of substitution athletes for female professional basketball coaches(I)  
   Ji-Hye Chung, Mi-Sun Kim, Bo-Ram Lee, Eun Choi, Sookmyung Women’s University, South Korea
52. Self-compassion and sport performance  
   Nikki Barczak, University of North Carolina at Chapel Hill; Amber Mosewich, University of Alberta; Robert C. Eklund, Florida State University
53. The effect of messages evoking pleasant or unpleasant feelings from physical education teachers on pre-performance  
   Tadao Ishikura, Doshisha University, Japan
54. The impact of contextual priors and anxiety on performance effectiveness and processing efficiency in anticipation  
   David P. Broadbent, Brunel University London, UK; N. Viktor Gredin, Brunel University London, UK; Jason Rye, Brunel University London, UK; A. Mark Williams, University of Utah; Daniel T. Bishop, Brunel University London, UK
55. The immediate effect of ventilatory training on heart rate variability, during training and challenge  
   Calvin Lu, University of Maryland; Yingzhi Lu, Shanghai University of Sport, China; Andrew Ginsberg, University of Maryland; Bradley Hatfield, University of Maryland
56. A systematic review of acute sports-related concussion assessments  
   Justin Moody, Robyn Feiss, Melissa Pangelinan, Auburn University
57. Self-compassion between high and low performers among NCAA Division student-athletes  
   Urska Dobersek, University of Southern Indiana; Abbey Huffine, University of Southern Indiana; Mindy Mayol, University of Indianapolis; Lee Everett, University of Indianapolis
58. Examining perceptions of athletic identity and religious orientation between students competing in varsity and intramural athletics  
   Paul Saville, Samantha Meckes, Ali Valverde, Azusa Pacific University
59. **Measurement of ‘standard’ and ‘motivation held constant’ self-efficacy in older adults**  
   Jordan Kurth, Steve Amireault, Purdue University

60. **Examining the relationship between falls self-efficacy and postural sway in community-dwelling older adults**  
   Kathleen McCarty, Oregon State University; Winston Kennedy, Oregon State University; Samuel Logan, Oregon State University; Susan Levy, San Diego State University

61. **The relationship between social skills and social anxiety in Chinese student athletes: The mediating effect of cognitive disorders**  
   Ye Wang, Florida State University

62. **Social relatedness in CrossFit participants**  
   Julie Partridge, Kristiana Feeser, Bobbi Knapp, Southern Illinois University Carbondale

63. **An assessment of sport officials' perceptions of group cohesion**  
   Rayme Ehle, Indiana University Kokomo; David J. Hancock, Indiana University Kokomo; Kyle F. Paradis, Western University; M. Blair Evans, Pennsylvania State University; Luc J. Martin, Queen’s University

64. **The role of the coach in athlete emotional and motivational development**  
   Walker Lauren, Michigan State University; Martin Eric, Boise State University; Gould Daniel, Michigan State University

65. **Online social norms as predictors of self-efficacy and physical activity: The role of sharing about physical activity on social media**  
   Maria M. Beitzel, Katherine Balfany, Kathleen S. Wilson, California State University, Fullerton

66. **The effect of degree of interpersonal synchronization on synchrony-induced pain threshold changes**  
   Matthew Marini, Philip Sullivan, Zak Lewis, Jack Sampson, Brock University
